

POLITICS

Politics, in summary, this is the demand: my want/ is greater than your want! Who gives a damn about the rest.

The endless result is, as men desire it to be: ravage/ rape/ ruin/ destroy/ disease/ fail/ and fantasize about a future that does not exist. All say 'we can so?' without the slightest regard for the future, environment, and everything required for peace, happiness, harmony, or hope. So politics is fundamentally the doorway into war; because as men destroy, the end result is: WE DON'T have enough/ so let's take theirs! Or, let's distract those who are angry, with war against someone else: then they get what they want, 'which is no law to interfere, in what they want to do'. That costs all of life tremendously as is seen today in Syria; or throughout history as the only true, politically correct (give us what we want) answer of men, which is the path to war. Or more simply, 'I will take what I want/ I HAVE A GUN; etc?.

Leadership is about letting people believe whatever they want to believe/ therefrom politics result; as promises are made, which everyone simply believes without question. Resulting in lies, without substance. Or a future betrayed. Leadership is fundamentally wrong/ as this gives power to men, and power is with extreme exception: always tyranny, corrupted, wrong, fantasy, or failure. The path of a nation must then be LAW, if you would choose to build a future. Following anyone is unjustified, as that gives to them the right to make decisions which are not theirs alone to make. Followers demand it, because then they can say, 'it's not my fault?' even though you gave this one the power to make that decision. It is your fault/ it is your blame; whether they lie or not; you chose. The path of law is: to create one hundred or so, VERY SHORT LAWS; so that all can know what these are, and enforce that reality on society itself. That means if we must, those laws created will be changed/ but no more shall be added: so that every citizen may know. Because they know, what is truth and rights; that we ourselves did choose; then we govern ourselves. Taught in every school, examined for truth in every life: chosen, or changed, by all. Slight differences of opinion, will be reduced in a public courtroom: to an agreement accepted by we the people, or denied; as a precedent which will then decide the future of all such cases. The critical role of government is then to investigate/ examine the facts/ identify the problems/ and determine if OUR LAWS, are being kept by those who push, or pull/ for or against society. No more 'lawmakers?' that term should die, if not applied to 'national vote?.

The creation of law is again, quite simple; and need be done only once, to any great degree!

IDENTIFY THE PROBLEMS (want is irrelevant)

IDENTIFY THE SOLUTIONS, (as best we can)

IDENTIFY THE FUTURE (by the consequences, that will be established from a distinct decision)

IDENTIFY WHAT CAN BE DONE (truth, and its reality decides)

IDENTIFY THE PURPOSE OF LAW (why, we must)

IDENTIFY THE DESIRE OF SOCIETY (this is your legacy/ this is your future)

IDENTIFY THE PUNISHMENT (you went too far)

ISOLATE THE DUTIES, OF A COURT AND ITS POLICING. (Open the door/ remove any judge that fails/ let the constitution rule, as democracy has ordered it so)

CONSTRUCT COMMUNICATION, ESTABLISHING THE PRESS; BY LIMITING ALL FORMS OF ENTERTAINMENT OR OWNERSHIP. WE OWN THIS, no other!

DETERMINE, IDENTIFY, AND CREATE WORLD LAW. No more military purposes, or money spent.

EXAMINE TRUTH, AND REMOVE ALL EXTREME WEAPONS WITH CARE; without exception/ by world law and policing established by/ for/ & among all nations.

DEFINE THE OBLIGATIONS OF BOTH WORK AND SOCIETY IN SHARING THAT WORK AND 'THOSE RESOURCES?.

(This is LIMITED CAPITALISM)

LET REALITY AND NATURE DECIDE: without our planet home, and its life that literally keeps us alive; we are extinct.

CONCEIVE OF, AND CREATE THE FUTURE BY TRUTH, no more theories/ no more extreme experiments/ no more genetic mutilation/ no more fantasies/ no more religion to lead/ no more failures in education/ no more lies, greed, lust, revenge, jealousy, or other such things. By removing those who clearly do not belong: as identified by hate. Hate is: the clear decision, 'nothing matters, but me?.

LET THE DIGNITY OF FREEDOM, THE REALITY OF HOPE, THE DISCIPLINES OF ORDER, AND THE FOUNDATIONS OF A LIFE DETERMINED BY PEACE, HARMONY, INTEGRITY, AND RESPECT define our world!

Simple and plain.

NO more university knows leadership; the damage and disgrace/ THE DISEASE AND FAILURE of this entire group, refusing LIFE MUST COME FIRST. Is now limited to what can you prove without the slightest bit of fantasy attached. Fools/ liars/ and thieves; are no longer needed.

As to working together for the sake of our world, for the survival of all life, for a future that can grant life to every child; at least for a few centuries if lucky. Greed must be defeated; which literally means men MUST be replaced as leaders of this world. Because their entire description of leadership revolves entirely around money/ and money, is nearly useless in terms of keeping this world alive.

While it is necessary to reward some more than others; it is absolutely essential: that life determines the choices that will be made/ based upon truth, and chosen through respect for all parties involved, which DOES include lives not yet born.

Men will scoff, and claim it can't work/ because they want what they want: which is selfishness.

Women must do better, while understanding neither life or death has a price/ rather it has a beginning and an ending in time. The difference is, without selfishness/ there can be hope. But without hope, there will soon be only war, horror, and hell.

You work together in war, for the common good of ?your side?/ with or without pay, because the money is then irrelevant: life or death is all that matters, to a true soldier. The same can be true of society without war. Work together, building for life/ choosing for the future/ sharing the blessings/ and desiring friendship over substantial wealth; are all elements of survival.

You cannot continue to destroy resources. You cannot continue to destroy the planet. You cannot continue extreme experimentation. You cannot survive weapons of mass destruction. Basically everything your ?university cult? has given to you/ is a disaster in one form or another; and must be changed. Establishing LIFE alone; not fantasies, trophies, or toys is important.

Life with friends, disciplines, love, truth, happiness, faith, courage, respect, heart, hope, romance, soul, and all things of value: WILL in fact, ?be a very different world?. It's a choice/ until you pass the point of no return; a door clearly visible today. Stop being ?dead?(I have no hope/ no rights/ no means or methods or communication or anything I desire)/ and choose for LIFE ON EARTH.
