although we must never lose sight of love, romance, value,
and courage; the consequence of our reality does establish

these words:

the value of our world

is not trivial

the value of our bodies

cannot *truly be measured*

the reality of our drinking water

can be lost

our agricultural lands are being salted

our oceans are approaching catastrophic

over population of humanity

is growing at roughly 250 million a year

more mouths to feed

weapons and war

are devastating life and cities

people are intentionally mutilating nature

toxic waste is buried at a trillion pounds a year

pollution is tremendous

resource losses assassinate the future

ice cools our planet in summer

weapons of mass destruction

people literally trying to ignite atoms on fire

extreme lies regarding currency

debts that can never be paid

*to balance these facts and much more: I believe the
essence of romance must say it best. "That if my heart
were true to you"; it would become my best wish: to be
there, when your own heart came alive; with the wander
and truth of life that begins in the happiness of "our trust"
as love ignited. In, "A passion beyond self"!*

Introduction:

While universities have now achieved the possibilities of destroying life itself, by tearing it apart; and opening the door beyond limits or boundaries or balance or thought. They have no possibility to repair the consequences of playing god with life or earth.

The greatest example of that is: all facts prove that the sun is powered by nuclear fire {burning the bond in atoms}. Their curse is: not enough gravity here, “so that energy, will just extinguish itself”. They risk and gamble this whole world on that one simple conclusion; and if they are wrong. **WE BURN.**

What, your gods of university; can, do, and have offered you is change. Within that change they have accomplished, **every threat of extinction exists;** as the end of life on earth, with genetics/ even the planet, and with the ignition of a nuclear fire/ even changing the solar system itself, by turning this earth into a sun.

How is that NOT worth, **finding the truth** about what they do, or do not know? How is that not worth a legal investigation to determine for ourselves: **WHAT HAPPENS TO US, WHEN YOU ARE WRONG!** BECAUSE, there is **no going back/** and there are no “do over's” with any form of extreme experimentation; as is being done!

One ignition/ one biological catastrophe/ one tragic mistake; and life on earth is over!

Because that is exactly what the universities are playing god with.

About the author:

Into the elements of life, we find eternity visible in the dimensions of thought; because true life is thought, conceived by its own deliberate companion which is energy. Thought can be eternal, because it is not limited by energy, it is merely conceived by energy, and contained by the existence of an identity. Within that reality, time visits us with options to conform to our own desires; thereby achieving the foundation of happiness itself, which are freedoms. Reality adds in: that every living thing is a miracle created by thought, in design and engineering that cannot be denied without lies. Reality adds in as well: that this earth, is a miracle of possibilities, and the birthplace of countless life forms so diverse; we have yet to discover them all. Into this womb of creation; the values of life are simple: "stay within the limits and boundaries"/ accept that balance is needed for life to exist/ and trust that the miracles we cannot explain in any other way [without the true intent to lie, and steal, and destroy]. Are in fact a composition capable of declaring; more is here, just as we are more; than time.

Preface:

REALITY INSISTS: that I give you one last gift!

About survival, but only if humanity does change before it is the point of no return.

Back story, to that decision:

For those who believe “your fantasies can last for your lifetime”; reality states clearly, the cause of war is: “they did not”.

War exists, because reality forces truth to be accepted; and instead of fixing that reality, men are led into battle “so we can take theirs/ let them die, instead of us”. Because the fantasy of discarding consequences can last only so long.

The fool then says, “We don't have to change nothing”/ because we want what we want. But alas, want is the foundation of every lie; and there is no future in a lie. Reality proves that, and war begins. Only truth survives.

Introduction, to the basic elements of this work:

In all of history, even with all its corruption and disgrace and complete disrespect for life and living: it is today, that wins the prize for most of everything bad. Greed, as is “yes we can take what we want”; rules life and planet. And all the people say, “that can't be true/ we are winners/ we are doing great; we just want what we want”. But the evidence of your reality says: you have torn your future into sewage, and raped your world; soon beyond repair. Leaving this entire earth to die, ravaged and destroyed, from pole to pole. While the universities lead the way; as their constant cult follows, and bows

down in homage to those who are in fact terrorizing both life and planet. With extreme experimentation, and the intent to play god. To your shame, you let them.

EVEN SO: if the tiniest bit of hope does not remain, because life fails if it does not. The value of love itself will die, if it is not treasured/ and that ends life on earth. **So we must all sustain hope. HOPE is, how we quantify love, distribute its warmth, and earn its value. Without love, people fail themselves and their world loses hope.** Which does distinctly suggest why, this earth and its humanity have become, what they have become: by standing on the edge of our own extinction.

Therefore the question is: how do we survive, by change?

No more efforts will be expended to inform you of extreme university experiments, or other threats of extinction: YOU KNOW, the cost of being wrong: STOP THEM OR DIE. Literally, as simple and plain, as that! Right now.

Table of contents:

Chapter 1:	Identifying problems.
Chapter 2:	We are the problem, because too much competition has consequences.
Chapter 3:	Learning new ways.
Chapter 4:	Limited capitalism.
Chapter 5:	Beware of the fraud, called university.
Chapter 6:	<i>The pillars of our world.</i>
Chapter 7:	<i>The consequences of a male dominated world, as seen in history.</i>
Chapter 8:	<i>The future, by male domination!</i>
Chapter 9:	<i>Survival or death, is a choice/ but not for much longer.</i>
Chapter 10:	<i>What it takes to survive, even though that is now nearly impossible.</i>
Chapter 11:	<i>The second step in survival, beyond the elemental demand for investigation of consequences; to the reality that "university is not god".</i>
Chapter 12:	<i>The realities we must meet and accept, in order to survive. If there is true and dramatic change enough, to make the future possible.</i>
Chapter 13:	<i>To govern ourselves, we must learn to respect each other.</i>
Chapter 14:	<i>A summary of choices.</i>
Chapter 15:	The seven decisions that cannot be avoided anymore.
Chapter 16:	True Democracy.

To understand the decisions. We must understand the consequences to identify those, we must accept the conditions of truth.

Every participation of law requires evidence.

Every construction of evidence requires knowledge.

Justice is the foundation upon which every value is known.

Chapter 1: Identifying problems.

Therefore strictly talking survival, by change: identifies the three distinct realities aside from extreme experimentation {the universities did this}, that we the people must resolve for ourselves.

Let us begin with men, and their desire for war; which employs (we need a solution for our boredom and to survive) and has employed (people will do this, if we lead them) a large percentage of the population throughout history. The men will insist, we cannot survive without the battlefield. To a degree they are correct: because humanity wants to take the reward of someone elses' work/ take someone else's life; even though the cause of their distress (we are in trouble) is entirely their own. So the cursed (we did what we should not have done) will never leave human existence, and the reality of those who curse themselves must become: either change yourselves or die. Throughout all of history, their answer was: kill someone else, and take theirs, or we die. Because believe it or not, that is the easy way; and the mob likes it, until it turns back on them.

The question is: how do we, the world; stop

them from doing that? The answer is: we let them fight themselves, in a battlefield on their soil/ with weapons, and rules; that we the world provide. In other words: this is your problem, you caused it to occur/ and now you either change, OR you can war without complete destruction to the needs and realities of your own society. Swords, spears, and single shot guns with 20 rounds of ammunition comes to mind; in a fenced-in enclosure with mines, or robotic weapons placed to say with certainty. **NOTHING comes out of here (no escape), but peace or death.** Take your pick.

You will set out the reward to be achieved. If two nations want to war/ the world referees: same battlefield; only the border moves, a predetermined amount. So say the people, and nations of earth. Because as reality proves: to unleash hate, is to destroy what we all need to survive. It must be caged, or removed to isolation “where only hate exists”! In other words: by forming our own policing, and **our own world laws by vote among all nations: we insure, the battlefield stays small.**

The critical part beyond that simple solution is: what is human hate, will not join/ because these hide in the darkness, as “predators in the night”. **To FIND THEM;** requires society, to filter its citizens; by moving those who are found guilty of hate outside the lines of society itself. A reality you will deal with, as the numbers become apparent. Anger is not hate; it has a solution that can be found. Hate is a degree of violence, that surfaces “to play god with life”. Which identifies why the universities are so willing to participate in experimentation that is literally designed to cause our extinction. Do these two things; **FIND HATE/** and fix anger: then the need for war will end. Even if the desire in men remains; because if there is no army to hide in, then there is prison, to take its place.

It is then and only then: that world resources as is consistent with fair play, and realities presented by truth: should be shared. It is true, that world natural resources are to a realistic degree; “same for all”.

Chapter 2: We are the problem, because too much competition has consequences.

We then search the solutions for: TOO DAMN MANY PEOPLE; and find few. Realizing every life is important/ but so is this world, and every other living thing in it. The cause of overpopulation being shared by both men and women, because of a variety of reasons; they both refuse to surrender. Which means it is pointless to review those truths.

What does matter is: YOU HAVE NO CHOICE, but zero population growth; other than extinction. Simple and plain as that. Make your decision/ there is no going back!

It is women who hold the key, because they produce the child. Even one man with today's fertility clinics and the rest can produce "a million babies" with that sperm. Yet alone a million men cannot produce one single child. So **it is not a choice**: women must decide for themselves, what they will do. And men must compensate them according to what they did honestly do, for life and planet.

Women will demand: "let all the men have a vasectomy"/ that is the answer! But again, in reality it takes only a very few men to "make a billion babies". **So it won't work!** And again: with a vasectomy, the chemicals associated with sex end/ and all pleasure with it. Which means women will not be getting sex from anyone who has a vasectomy: so ask yourselves HONESTLY: is that what you really want? Truth says no, it is not/ or tragedies both small and great will follow, in a wide variety of ways.

There is claimed to be: mutilated foods which can cause sterility in men, perhaps all life. Dependent upon what is true: **that really means, it is a very dangerous road to take.** Nonetheless: YOU made overpopulation, along with universities; and it is our clear road to extinction. So the demand is: **YOU must fix this or die as a world/ because a quarter billion new mouths to feed each year over deaths: is no game.** The foundation of tears, which says “save every child/ save every life”; comes from a foundation of liars. It is the balance between life and death; that has made our own lives possible; and without death, there is no balance. Which then becomes extinction for every living thing; as one species takes everything, and then dies, because it has nothing left to survive with. Ending in genocide, insanity, and cannibalism. You can save a child; but it comes with the price of no more children for you, after this one. Won't pay that: then no help of any kind for any cause for a nation that does not get at least 90% compliance. It remains no help for you, or your child; even if the rest do get help: if you don't accept our price. No more games, and no more denial, and no more tears will matter. Pay the price, or face war; because that comes next/ when you destroy the environment, and the living things you need for life to survive.

The critical truth of death is: life lives here no more/ and that reduces even a human body, to nothing more than the resources used. To give nature back its own life, IT IS NECESSARY; that every dead body be turned into “fish food” for the oceans. And delivered by a feeding barge that either drifts or is anchored several miles from shore, at a minimum. IF YOU DON'T FEED THE OCEAN LIFE, THEY DIE (because of what you have already done/ AND WAR WILL THEN CONSUME YOU; because

more than one billion people live with food from the seas.

At a very conservative 7.7 billion people on earth/ with 51 million square kilometers of agricultural land available: **that equals 1510 human beings standing on every square kilometer**; of agricultural land, on earth. And every other living thing on earth land; needs space and food and water too. We eat living things; which means they need a place to grow, and survive too. One square kilometer is equal to 247 acres; or just over 6 people per acre of land. Without life in the seas; there is only war, and cannibalism. **{are you suitably shocked?,** the corrected answers are 7.7 billion divided by 51 million=150.9 human beings per square kilometer. One square kilometer still equals 247 acres divided by 150.9 humans per acre is= one human per each and every 1.64 acres.} which is literally only **barely sustainable**. Unless you believe all diversity should end. Because every other living thing has to eat too. And the food from that acre must last for an entire year; and every human being expects to live for one hundred years. **So add it up.** But remember that is all the food from land for everything; and if you cut down any more trees, the atmosphere will detach from the planet; and wind will increase beyond your imagination. And then there is oxygen, drought, changing climate, chains of dependency for all life to survive; endless pollution; and more. YOU have been told. Remember this as well: I grew up farming in one of the most productive areas of this world; corn being one of the **highest yielding** "weight crops"; averages 5.5 tons per acre(a bushel is 60 lbs). Not the above "40 tons per hectare, as a world average (Some 795 million people in the **world** do not have enough food to lead a healthy active life. That's about one in nine people on **earth**. The vast majority of the **world's hungry** people live in developing countries, where 12.9

*percent of the population is undernourished.)". That is another lie. While it may still sound like a lot; a trillion tons of poison: The 2010 **AGRICULTURAL CHEMICAL** use data for corn, organic corn, upland ... **SALT** was the most widely used pesticide overall,. Is created to make that happen; fertilizers are used, potash for instance will not last much longer; and it is altogether completely unsustainable. by P Shrivastava - 2015 - Cited by 564 - Related articles*

During the last century, physical, **CHEMICAL** and/or biological land ... **AGRICULTURAL** crops exhibit a spectrum of responses under **SALT** stress. to a variety of mechanisms proposed from time to time **BASED** on studies done. *Not including the genetic manipulation of nature by men; who have no clue, that they are opening the door: to a biological mistake that ends all cereal grains forever. By removing, every defence that seed has.*

WASHINGTON, September 20, 2018 - Without urgent action, global waste will increase by 70 percent on current levels by 2050, according to the World Bank's new What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050 report.

Oxygen Depletion

We are occasionally reminded that fossil fuel burning is depleting atmospheric oxygen at a rate of almost 1000 tons per second. This is about 3.3 percent of the atmosphere's oxygen. Such a loss would be equivalent to increasing your elevation from sea level to about 330 meters, or about 1100 feet. Aug 6, 2014

Modern Records of Atmospheric Oxygen - Carbon Dioxide

https://cdiac.ess-dive.lbl.gov › trends › oxygen › modern_records: Stupidity arrives with “a one percent population rise” over the entire twentieth century; by dividing the 6.4 billion into the nineteenth century 1.2 billion people in 1900. one percent of one billion which is the number they use is 12 million people per year; over deaths. Which in one hundred years equals another “billion people”. But of course that is not real; like compounding interest, the population rise, by the number; does not remain steady at only 12 million per year. But in one hundred years became roughly 5 times more; [roughly 2.5%]. In the last twenty years population rise is roughly 2 billion more, which now makes that [roughly 5% for the next century if this remained the same]. By: Creating a rise in eligible mothers; And since the birth rate has been steady at 3-4 percent per year; that equals roughly one quarter of a billion more mouths to feed each year/ as life expectancy goes up. The sickest people on the planet; or a crime is being committed. A reality that must be dealt with; because the children ARE NOT YOUR SLAVES. You may NOT incarcerate them, with your medical bills. U.S. health care spending grew 3.9 percent in 2017, reaching \$3.5 trillion or \$10,739 per person. As a share of the nation's Gross Domestic Product, health spending accounted for 17.9 percent.

Rate of species extinction:

At present, the rate of extinction of species is estimated at 100 to 1,000 times higher than the background extinction rate, the historically typical rate of extinction (in terms of the natural evolution of the planet); also, the current rate of extinction is 10 to 100 times higher than in any of the previous mass.

Holocene extinction – Wikipedia

<https://en.wikipedia.org> › wiki ›

Holocene_extinction: Garbage identifies the reality of resource losses, and corrects for the claim: “we don't have to care”/ because life ends without resources. Making it true that the children have been sacrificed to death.

The reality of drinking water loss, is far more severe than this link provides; particularly in America. Because there are many unreported threats, and hidden truths.

As is the constant of all confined “life stocks for human food” the possibilities for a disease outbreak, whether in the sea or on land: that can then infect and alter everything we depend upon; is imminent. We need so much; that it is impossible to hope for regeneration if even a small percentage worldwide is lost. The sterilization of plants/ end of diversity/ genetic alteration of food sources/ reduction of pollinators/ endless poisoning by the trillion ton per year; and more. All outline catastrophe is imminent. We quite literally survive on the “way things were, by natural selection”. Humanity has changed that, and all boundaries, methods, and limits produced by nature will soon disappear. Man gets his wish to be god: “hum, he has always done so well/ what could go wrong”.

The constant of all things is: humanity wants to lie/ because if they don't curse themselves with {we know there are consequences for the future, but we don't care}. Then they must change their ways, and in this world: that means enormous change, or their children die a horrific

death. The universities want to lie: because if they don't curse us all; they can't play god, and spend quadrillions on their toys. The media want to lie: because nobody wants to know, without change there is no future. The politicians want to lie: because there is no power in admitting their choices were bad. Religion wants to lie; because they don't want the reality, of what their books predict. Even the children want to lie: because they just want what they want; and didn't everybody else get what they wanted? Alas, lies always fail life. If we take a 1.2 quadrillion dollars and divide it by 7.7 billion human faces on earth: we get \$156.00 US dollars per face; just in derivatives, outside the US. While that may not sound like much, the reality of resources it can buy is enormous; stripping the future of any hope. A derivative is entirely "theoretical money"/ and does not exist with any real standard associated with it; such as gold would be behind a currency; which no longer exists either. In fact all human currency with very little exception; is entirely "simply a number"/ which can then "disappear in an instant"; because it has no backing in reality. Instead fantasy money strips, rapes, and ravages resources; to leave the future dead. Like everything else, including stock markets; it is all, a pyramid scheme; that will end in war or total bankruptcy for this world. That is the choice. Or more simply: while you may be glad your parents believe they have money: the truth is, they only have debts. Any debt they don't get paid, becomes "the life of a child" taken away. Because unfortunately debt is merely promises humanity made/ **RESOURCES ARE FINITE and WILL END!** Their fantasy money however does not, as they do steal the future of every child. Without resources war is without end. **Without water, WAR IS absolutely extreme!** The universities made it so, with manipulation of currency/ media supported and defended them by

refusing to enlighten the public of hidden inflation and debt. And they laugh at you, because they took America; and destroyed the middle class by combining everything into a tiny few hands: and made that "too big to fail". So no matter what they do; you have no option left, but bankruptcy. Current work is inflation being used to automate even more factories/ and eliminate even more jobs. Because a slave has no options. Proving beyond any doubt: that the fundamental purpose of "university knows everything", is: **THEY HATE YOU.** If they did not, we would not be facing our own extinction. Nor would we be facing the consequences of their own extreme experimentation; and there would have been infrastructure spending to provide a future for every child. None of that was done. But they did make one big mistake: counterfeit money is worthless, "even if you have billions of it". Their's too! It is not the money (just a promise) that grants a job; it is the resource, and opportunity to use it; with knowledge, through understanding. **Limited capitalism: is the democratic right to enforce by law: there shall be limits to maximum and minimum income per year/ as well as control over personally claimed resources. Control your own bankruptcy; and determine by public vote; what the outcome will be.**

And then we have all the weapons of mass destruction; and a world ready to fight: because now billions of people believe they should have more of what they want. And all the rest say: we are tired of being invaded by people we didn't create for ourselves. People taking what we need and want for ourselves. Gee, what could go wrong? It really isn't worth, listing all the things which have already gone wrong. You are blind, deaf, and dumb. Worshipping the universities who brought you here; as god. While the priests of media insure you don't forget/ and the politician, industry, banker, etc; stakes his

or her career on “doing whatever the universities ask”.

Chapter 3: Learning new ways.

We then turn to society, and establish the third singular foundation for changing life on earth [each of these 3 first chapters, must be independently accepted].

By the laws of democracy: we establish a contract with ourselves/ which we then enforce, by proving WE THE PEOPLE SHALL own the last say; under the terms, of our contract “the constitution, as simple and plain as we can possibly create. Which then becomes our government”.

Government means: whether by law we establish for ourselves {the rights, and the guarantees we demand}, or by the enforcement of that law with redress of grievances [to bring our employees of government to court/ and judge their behaviors, by public trial; for ourselves]. **WE OWN THE NATION OR WORLD, AS ONE VOICE, governed by “our government” which is: constitutional law;** a reality of ours, OVER YOURS. To attain the critical foundation that is WE THE WORLD OF HUMANITY; have made this our own law. Which means we write that law, we vote upon that law, and we enforce that law as our democracy/ or world, through a constitutional contract that commands: we the people are the owners here. That will then include **the laws that govern every leader** throughout this earth. And the policing from a world defined by our own voice; over each other/ by our participation, in that creation of law, by human public vote.

The foundation of democracy is: ONE CITIZEN/ ONE VOTE. *It is not, voting for someone to vote for me.* Therefore the rule of democracy is: we shall not hire others to vote for us/ but instead as is truly possible in this day: **WE SHALL VOTE, on the law, that governs our lives;**

our nation; and our world, for ourselves. No more voting for someone to vote for me: one citizen/ one vote; is a future we must choose, and then both earn and defend for ourselves. **You will not survive, if as a majority, you do not accomplish these 3 independent “chapter truths”!**

A law correctly written, can be defended; once it is accomplished/ it need not be redone. Which means distinctly, that we need no more of “the lawmakers”. Except for the need to renew or change the constitution itself; because that is not a document to be subjected to majority rule. That is a human conception of the best we can all become as one nation united; and it must protect necessary individual rights, regardless of the majority. “lawmakers” will become investigators; to guarantee our laws were being followed as designed.

Chapter 4: Limited Capitalism.

We then turn to living. The very first order of business is: **LIMITED CAPITALISM!** Capitalism means: each is responsible for making their own way in life. Your job is to feed and care for yourself; to do your part in making society, environment, and world; livable for all. Our job as society, is to make that possible for each one; by enforcing the rule: we are equals, but not the same.

To do that: The removal of predators [those who “smell the money”/ and care about nothing else]. Are mediated, by establishing a foundation that makes all of humanity as equal, with opportunities; as it is realistically possible to be. Limited capitalism means: it is your job, to work for your living, in whatever way you can accomplish when choosing for yourselves as much as it is possible for you to do. We owe each other the opportunity to participate honestly in work and life, with value; as one society united. Sharing the work and the resource as it is possible to do; with a future for life and child. But not more.

Limited capitalism: is accomplished by a true citizens vote, which then chooses the maximum income of every citizen per year/ and the minimum income of every citizen per year. With a separate vote to choose: a base income level for the young and the immigrant. That gives everyone a similar chance; remembering that we are not all the same, as workers/ nor is the value of our input the same as others; so there must be a range.

Limited capitalism: identifies the amount of resources anyone can hold claim too. In other words, in appropriate area's, and for appropriate reasons: we will vote upon how much land you can own/ resources you

control/ rental units you are allowed, and so forth. Because we have rights too. Because the future has needs too; and they cannot be assassinated, just because you want more to throw in the garbage mountains you create.

Limited capitalism: requires a repetitive return to the vote (every 4 to start/ every ten thereafter or so), so that as reality demands/ you can adjust those limits. Without destroying the future for lives yet unborn. You will vote and stick within the limits until the next vote occurs.

Limited capitalism: is the removal of all welfare programs, along with the assurance; if you show up for work, and do the work you have chosen to do, from what is available. Then society does guarantee you a job. Whereas all who can “make their own job”; shall be entitled to more. The primary job to be done is insulation/ and all things which create a more sustainable world; and rebuilds what you have destroyed. You will vote and stick within the limits until the next vote occurs.

Limited capitalism: removes the medical industry from all forms of business and industry, to create a value for life; instead of surrendering to the current extortion and greed. That will mean: WE THE PEOPLE SHALL, decide how many medical professionals will be graduated. What they will be required to learn, on a graduated system; without the curse of tyrants and failures deciding for us. We will own the patents and rights of all drugs and medical tools in or through the pharmaceutical industry, and such business. And we will vote, upon the methods, and the amounts; by which these people get paid. We will own the right and the reality: of a fair and deliberate identification process by which those who are doing an excellent job are rewarded/ and those who are not, shall

be dealt with as is realistically fair.

Limited capitalism: removes the public disgrace, and theft of unions in any form of government/ it is abandoned, and constitutional decree shall occur so that it NEVER returns to our society. It removes the pension plan of all parties, and replaces it with same for all "social security". That social security, including all forms of medicare; is then placed within the hands of those who will be receiving it. In its entirety; and they will decide (same for all by vote) among themselves how they will spend that money; as a percentage of the net income of a nation. You will vote upon the size of that socially shared security pack percentage of income; for this herd of people.

Limited capitalism: removes the disgrace of public and private education/ demanding, that each student tested once per year; shall in fact determine the pay of that teacher and school. If those students fail to come away with something that is usable and significant to living, to life, to work, and to the world so they can earn a living and contribute to society: the teacher gets nothing/ and the school is given over to another, for the purpose of doing better next year. There shall be no qualifications to becoming a teacher: but if your students vote to have you ejected during the year for not doing a significant job/ out you go. Unless you prove otherwise. The universities shall not offer schooling at their price. They will offer jobs at their price/ and without an apparent and real job that lasts for the student; there will be no further debt, unless that changes. That is schooling, and it does not include the cost of living to be there/ that is, a student choice. You will vote upon the pay of teachers, upfront and for real: for the level of learning achieved/ at its various

stages, including learning how to be “a valued neighbor, friend, marriage partner, worker, environmentally safe partner with life; etc”.

Limited capitalism and true democracy (we decide the law): removes the politician from office/ we don't need you anymore. Because the aim of both limited capitalism and true democracy is: TO QUASH AND REMOVE ALL POWER FROM OUR EMPLOYEES, AND GIVE IT TO OURSELVES. Once that is accomplished; the job of a “new politician” is to investigate their appropriate districts and beyond to insure that our laws are being enforced and upheld. Simple as that; and nothing further. Because now we control the money by insisting the currency shall be tied directly to the census/ all transactions with foreign nations shall be with “reality, not promises”/ and every form of taxation shall go directly to the distinct purposes for which we chose to form it. The IRS shall be disbanded in its entirety; and shall be relegated to local chapters which the public shall vote to allow or remove from their lives. All IRS forms shall be clear and simple to understand. All IRS decisions shall be relegated to the businesses which are to be xed: BUT there will be penalties, if you fail to collect what the people have chosen for you by percentage of profits; to collect. You will present it to the public for their approval by vote; and then it becomes “your law”; to be revisited as necessary.

The fantasy money supply; which is nothing more than a pyramid scheme at its worse level ever seen. Shall find the bankruptcy it so richly deserves; along with all the other schemes and corruptions that “university guidance” has brought into our world to destroy both peace and harmony for us all. Bankruptcy means: that we shall begin

again with limited capitalism. By insuring EVERYBODY GETS THE SAME amount; within a very narrow range; until all the adjustments are made. We will vote upon the change, and separate out the lies; so that reality will prove who has more. If your work and your money was earned, then within the limits later approved; you shall keep that amount. Included is the percentage of ownership in a house and so on. If your money was fabricated out of lies and swindling and corruption as is nearly everything conceived by the university diploma: then as lies go/ so does your money, and it may include new debt. As reality proves you owe. It is not the money that makes a society work/ it is the opportunity to work, and the resources by which that work can be accomplished. Money is just a scorecard; and has no other purpose; ;which means it is irrelevant, {even if desirable} to real life. Gold shall be confiscated to return the dollar to a value with reality. That gold shall be held personally: and it shall be used to buy property as you wish: but you shall not buy more than 2 properties of a limited size/ gold has first rights, and it will then be seized in exchange for the property. To establish a foundation for currency once again. The public shall have the right to fundamentally determine how this part is done, and what those limits are. With limited capitalism: it makes no sense to own a greater property than will return you, that maximum income. Anything else, not intrinsic to the needs of "said business"; is lost to "the government". Limiting income size: opens the door to every small business that can exist; granting rights, and possibilities outside university control, to return.

Chapter 5: Beware of the fraud, called university.

The fundamental here is: the greatest curse ever to be conceived on earth, “is a university diploma”. Because they have united to become an army of invaders that then took over the world of nations. That silent invasion of enemies, whose armor has been media (worship the gods of university)/ whose weapon has been the courts (no one shall question our gods)/ whose supply line has been incorporated into every politician (we give you anything). Their power is fear. Their corruption is: the counterfeiting of currency, by adding to the proclaimed assets (its all yours). And their leadership survives on a bribe (anyone who bows down to us, gets a reward; after all “its free” for us/ because debts don't matter). When in fact, the money is all theirs; because they simply multiplied (inflated the currency) to get it. While denying that is true, and covering it over with media propagation of “anything else”. When adding these numbers to an economy, they get to choose any method of distribution/ any expense or experimentation they wish; to launder the money, and hide the reality. And the people choose greed; because the price for truth is too high/ and they want, what they want. BE DAMNED to the whole world, sacrifice every child instead. They have torn down many nations, with insurmountable debt, and resource loss.

The universities have invaded your nations, and have created the battlefield of war against both life and planet. They rage/ ravage/ ruin/ and destroy all life, in the quiet war; that is just like men have always done against each other. Only the universities war against all life and planet and every child. Because tearing down the future/

mutilating nature, crucifying life, sacrificing resources, and destroying the chains of our existence that keeps our lives from dying: IS THEIR LITERAL CHOICE. They promise you everything, as all liars do/ and they hide the facts of what they really do; as all thieves and traitors do. They change the words, they hide the reality in foreign languages; such as math you don't understand. They are mounting a last or final assault on this earth: by employing all they know, to either prove they are gods/ or kill us all.

Want to bet on how that turns out? YOU ARE! Because you refuse to question even the truth of what: igniting a nuclear fire will mean. As is the case of “trying to bring the energy powering the sun” here to this earth. As is the case of “in their words”: trying to destroy the very fabric that holds genetic nature together, in an effort to identify “how we can be gods too”. Their god is evolution: which means they believe in chaos as their creator/ then adding “one piece at a time”. You will get Armageddon (nature in chaos) instead. No going back. Fools is not a strong enough word; for any of you. BECAUSE YOU LET THEM DO IT, AND HAVE NEVER QUESTIONED ANYTHING; EVEN ONCE! To your shame.

The constant is: “WE WILL WAIT AND SEE”! But of course, that means you have passed the point of no return; and have become “the living dead”. Because you cannot turn back the clock; and all mercy will end. Or, more simply; you have waited too long to change your ways. You have failed life, child, and planet with your greed. “knees, glued to the floor/ head down”; as all true believers do. Because you cannot question “your university god”; as is true of all religion throughout history. Making belief (we can believe ANYTHING we want), the single most tragic reality of human history. Faith is an expression of truth shall lead us, because our

choice is to accept what life, planet, and miracles do teach; questioning every detail, so as to know and understand what reality can prove. **Do you see the difference?**

Chapter 6: The pillars of our world.

The critical question of life versus death, according to reality is:

That you must keep yourself alive in order to influence any other part or conception of life or living.

That you must keep your living alive in order to have a body that will accept your commands, and grant the elements of your brain to function for life.

That you must keep your world alive in order to have the opportunities; to make a decision and enforce that momentum of direction; as is consistent with establishing a purpose or desire.

That you must keep the living and the substance of other life sustained with credible rights and values and habitat; so they can form the chains of our own existence. And present us all, “with something to eat/ and much more, to live for”.

That we must represent and respect the water on earth, as our “soulmate (it travels with us)”. What we drink and what we use as is consistent with the ocean. Because without water of a valued purity, there is no future for any life on the planet.

That we must protect, and defend the resources of this planet, or every child becomes the living dead. Without resources, there is no work; and without work, there is no future for any living thing.

That we must protect and defend this planet itself; as we literally have no other home in time. It is our one and only refuge for life as body.

To rise above an animal, is to achieve and accept: the values of thought, love, truth, hope, and courage. Anything less, becomes want (predator or prey); and want is the basis of every lie (this cannot survive). Only truth survives. Only love grants the destiny of life shared. Only thought constructs life and its living. Only hope cares enough to give us peace through harmony. Only courage builds trust, and trust is the foundation of every stable relationship that can be achieved through respect (the value of wisdom/ the acceptance of truth/ and the decision to participate, as best we can).

To rise above hate: requires, that you never live in the past, not for revenge or any other description of life/ because you will judge it, or it will judge you. To rise above the present, requires that you allow and accept, that only truth knows what the future will bring; and that wisdom defines what you will or will not live as. To rise to the future, limits the boundary of every possibility, to the evidence of what can be sustained. Because without balance, discipline, order, and thought; only catastrophe awaits. The universities are a catastrophe; because they deliberately choose none of that, and intentionally create chaos. Hate is the descent, into your own personal prison (nothing of value exists/ but you, and even that has no true value).

To accept and identify the creation of love; is to understand the dignity of life is not as a body of existence. Rather it is to know, that the miracle of creation itself, is a value beyond the wisdom of a human mind. Therefore, to search within the experience and expression of life, by thought; is to achieve the journey beyond time, that begins as a destiny we identify as our own true desire.

Within the elements of gender, are the foundations for society itself. Without male and female, there is no life, beyond this moment. Without the balance of gender, and its relationship as the structure of order it brings to our lives; we lose hope in the future/ and that brings anger or hate. Without the disciplines associated with sexual existence; we the people, fail ourselves. Because we need the value, that is beyond self.

Our relationship as a world to “all its religions”; lives or dies according to what can be believed. But belief is identified as “I want, what I cannot have, or know for certain: therefore I believe what I want”. Making religion, the conception of man, with only slight variations caused by women. The constant is: humanity wants what it wants/ and lives to get what it wants, or hides in a belief that will get what we want; beyond death. Making a crisis of any kind; more palatable. The believer exists, by refusing all truth, evidence, consequences, or assertions that are not functionally or fundamentally what they want to hear: locking the door “with their book”, to say “this is me”. Faith exists by accepting all truth, evidence, examining the consequences of our reality to assess the future with wisdom, and asserts; by looking beyond ourselves, and our own reality; that truth will decide what our eternity can be. Thereby opening the door, beyond self to conceive of destiny: where your own hope, desire, and love seek to belong. Do you see the difference?

Our relationship as life, to life is based upon the evidence called truth; as revealed by the laws which that truth creates, in clear and certain translations defined by “what I can depend, what I can use thought to identify, and establish; thereby predicting what will occur”. Life lives by truth, and nothing less. Therefore by truth we become entangled with life. Every truth has its law, and every law that defines a spiritual reality; will not be denied. Your truth shall in fact become entangled by the reality of choice you make.

Death separates us from time/ thereby from body. But since life is a critical truth isolated by thought. The presence of thought identifies existence. So the critical question is: where does thought exist? It is not in the brain, because pregnancy reveals “sperm and egg (the essence of life in time)” begins a body. Neither is it in your choice; as death of a body, can come at any time, whether you choose it or not. What is left is the energy that lifts life from a conception to a reality distinct; as time alive. Offers us our best clue, that life as thought, originates through energy confined as an independent identity. Allowing for the disciplined question of creation: where does that energy go, when the mass of body is abandoned?

We now separate freedom from life, as the basis of death; and ask, can we escape this reality? The answer arrives as three distinct environments of discipline: to let the energy dissipate, and disperse; into “nothing”. To imprison the energy in its tiniest formation, of what I can keep alive as self. Or to release the conception of an identity, beyond the definitions of self, to accept the destiny that is

creation by GOD ! since we know, that without limits and boundaries there is no environment other than space. Our dimensional experience must be limited to expressions of freedom; within that sphere of existence. To conceive of order beyond ourselves, the hope of love consists of sharing truth will allow. To balance freedom with joy, the destiny of love desires, that we are confined only by respect.

Chapter 7: The consequences of a male dominated world, as seen in history.

There is only one true foundation of male human behaviour: with only very few exceptions, wherever there is power, there will be corruption and its consequences which are violence and greed. Greed because it conceives of more power, and violence because there is little that power provides other than, the push towards fear.

The driving fundamental of human existence is survival. To that end, when survival becomes desperate: the common response, with extremely few exceptions is: "let's take theirs/ why should we die"; as in let them die instead (women too). And war exists! Which does establish the constant human decision, whenever trouble comes; it is those who are not like us, that will be attacked.

The constant herd behavior is then: to gather together in distinct and distinguishable groups, so as to protect each other, because we are the same. It is as simple as: if I must choose between "family (like me)/ or those who are not like me"; then I choose for family. Just like every immigrant that ever lived; because we need each other to survive; as do those who are being invaded, either by armies, or "just too many, even one at a time; that are not us". And if those who are already established simply make room; the immigrant herd will grow exponentially, and then they will be in charge/ unless civil war establishes genocide on one or the other. It is no small thing. The constant of "university leads here" is: to create a situation whereby nothing is left BUT WAR. As is the plague of their existence on life and earth. They have

held our fate in their hands/ and it is now our turn to hold the fate of their work, and their future in ours.

The USA is a perfect example of that invasion (the reality these are not “us”): immigrants came and found resources, and the Indian nations were massacred. The more resources there are, the richer you can be; and so the tsunami of greed came/ and with better weapons, power became genocide. The world of Europe, dried one single tear for those Indian nations; and then came with absolute intent to commit genocide and take control. As is the constant of human history: if we can/ then we will. Just as they would do today, if in this America; civil war destroyed your ability to withstand that invasion. They are not wicked/ “they are just like you” wanting more for themselves; and willing to take it/ regardless of how that comes to be. Just like the universities have done in their silent war (steal their soul/ destroy their world) against America and life.

The current reality of extreme population guarantees strife and cause to believe the competition can, or will kill us; so says the evidence of our reality. That fact, will make it almost impossible to mix and sustain a peaceful society with any large force called immigrants. So the only real solution is: all those who do not live in their own country; should in fact go home. Unless that country fully accepts you, and you become their legal citizen; surrendering your own/ no going back. Because genocide is not far away; as history has proven time and again/ even if none want it, whenever a threat of survival arrives; the very first thing men do is look to war. Unfortunately, as Germany and Japan have already proven: when one group is allowed to create massive amounts of weapons, and believe they are over-crowded

already; the answer of men is war. The only solution to that is a limited military, with limited weapons; and a world policing force, that is constantly replaced so as to keep it under our control. With world law and a world courtroom to grant us all control over those who lead. It is then that the truth: you will determine your own future; and you will be responsible for your own choices/ and there is no one to blame but yourselves. So if there is to be civil war; it will be "with yourselves". Little else will keep you alive, because if a group is vulnerable; a mob will form. In nations such as America; the reality is, that it will need to be divided into smaller sections of this group now lives only here. A ONE TIME ONLY solution; whatever is done/ is then done, and you will all live with the results of what you do, or don't do. All mercy dies; only the world law that you design shall govern an intervention from any source or kind. As is consistent with "fair play"; you are responsible for your own future/ all immigration ends, unless world law (the individual vote of "we the world of human existence" itself) shall design a different solution. Justice means: with respect, we are given the law to guide our lives. If you fail to respect that law/ then you are guilty of its consequences; and shall endure as best you can. The demand for "world travel" must be addressed by world law as well; along with the clear consequences of failure to obey. You will not assume to make me responsible for this: YOU, and your cult worship of universities are responsible. This is just your reality, the consequences of your own decisions. No, I do not discount large families/ they are "lovely, if loving". But it is a finite world, and we eat other living things, and they need food and life and habitat too. Childhood is over; grow up, one and all. Because there is no other choice beyond death.

The alternative is: that you all become “living human beings” with actual decisions that are defined by love and respect for each other; instead of animals. A reality that has never existed since the beginning of time. But some island nations did it; until they became overpopulated: at which time they became cannibal's. So go ahead and try if you wish; after all, what do you really have to lose? And just so you know: immigration is literally a world wide reality, and there are no people greater than any other. Alternately, those who built a nation up; are responsible for keeping that nation intact/ and cannot be replaced by another: unless it is war. As history continually proves. Or more simply: welcome to the world of hard choices, or die. Because reality is not a fantasy, and lies will not save you for long. But then since you are destroying the earth, and every resource that exists: why bother, right! “just go fuck everything in sight”/ or is that not, what you are already doing?

The critical truth is: that so long as there is a large immigrant population/ there must be guns in society as a method for each to protect themselves from the others. It is only when a nation is largely the same reality of people; that it can afford to surrender its weapons: IF A WORLD POLICING organization exists to control all outside forces, and in particular the leaders. If you cannot trust yourselves, you have failed life. If you do not maintain a true world policing force, with the vast majority being replaced every four years or less/ and all leadership replaced every two years. Then you cannot trust them either. It is again the reality of human existence, that men war. But if you replace their weapons with “swords and spears”/ then you don't lose your cities; just create a battlefield; and establish the rules. Winner gets what they are promised; as a border can be moved if world laws

allow. Take a look at your reality, and prove this is not a valid return to the past. All weapons of mass destruction can be removed with world law and policing; a reduction in military forces and weapons. Either that, or life on earth will soon be dead: YOU are surrounded, by a “thousand threats of extinction”. The only thing in doubt about our future is if we could survive, even if we did our best. Like it or not, the evidence is real, and conclusive: change or die/ soon you will have no choice but death. So make your decision now, and remember; your CHILD lives or dies, from this choice too. Find a brain, YOU NEED IT!

Human history proves: that men are in charge of this earth, because force is greater on earth than love. That reality of existence could not have been proven more clear in all of history: but by the biblical story of JESUS . A man who proved to be, non-violent; so that with clarity and certainty: those who were not like him, would be revealed in the contrast of “lives, and life led to their conclusion”.

Or more distinctly; no matter the cause, greed and power will win in time. Because violence is more persuasive than love. Which brings us all again to the reality of human existence which is: there are only two true directions in life, you will choose either LOVE, or hate! Because everything else is survival. Therefore the elemental reality of male human behavior [because we do have thousands of years of proven history] is towards hate (mine, its all mine) and greed (I want more/ yours too). While love expands the human experience in ways beyond self, towards happiness, hope, and all things valued and respected. Hate creates want, and want is an abyss that will drown those who fall in too deep. They then become terrorists, with bombs, fire, extreme

experimentation, and hate; that must be tracked down, and removed from life, or as world law allows.

Religion changed after JESUS “lived and died”; bringing the message, there is not only love in life and living, but literal, life after death. After a few hundred years, that became obey or go to hell/ and then a common religion because the expectation was: now we don't have to do anything, but say a few words, and we get eternity, as the rich: for free. As is the constant of religion throughout the ages; as is “I believe I will get what I want”. Unfortunately for humanity, little of that is true; only the message of love, opens the door to participate in an eternity if your value is true.

We then review the reality of male domination in three distinct truths.

- Nothing is more deliberate than violence, and its concurrent partner, which is greed, the desire for power. Predator!
- Nothing is more certain than the need for an army, to unite us together so we can defend ourselves against that predator. But without balance and a purpose beyond riches; society falls into the abyss of want, and therefrom destroys itself. To go find war. Even as prey lost in the battles created by failures and fantasies.
- The only exception is love, and it cannot stand unless governed by respect, truth, and law. Thereby humanity accepting the limits and boundaries that are consistent with building a future for all of life and planet, with balance. Surviving ourselves within the essence of a

society formed by peace, harmony, discipline, order, courage, and happiness. This is human being alive; and only a few exist/ so it is rare, throughout millennia. Weapons and the thirst for power and greed see to it.

Chapter 8: The future, by male domination!

What matters to men and their leaders is: WE WANT THE BEST WEAPONS THERE ARE, and intend that none should challenge what we want to take for ourselves. Simple as that; and ninety percent of men agree; because they know, if the others have these weapons, then we get killed. So the one constant of male domination is: we will spend all the money and resources we can: TO CREATE, THE OPPORTUNITY OF VIOLENCE!

We then search throughout history to prove: what will men do with that power, and its violence? The obvious answer is: whosoever can, we seek to prove “shock and awe”; so that those others should FEAR US MORE. Which brings us all, to weapons of mass destruction, and the endless production of world ending devices and death without end. Because fear is, the god of hate.

We have then established: that the overriding intent of male domination through its leadership and worship of war, is therefore HATE. Hate consumes love, to survive. Because hate cannot survive without an escape from the drowning of “a soul”. They then reach for “to own any soul” to remember what life is. That fails quickly, and the anchor of a life taken, sinks them lower into hell.

Hate then seeks to enslave and control, because it is a reality of war unleashed; and war MUST have an enemy to survive. The consequence of that is: to formulate a plan, and commit the acts that separate society into “our army”/ and theirs. History will prove that

so.

We then look into the future of this day: and find leading the charge currently with the weaponry made by universities is China. Or more distinctly, data accumulation and their incursion into the world of using facial recognition as a means of buying throughout society. This is true power over the individual; as soon, nothing will be bought or sold to the individual UNLESS you have met the demand of their "leaders"; as decided by computer and soon that will incorporate artificial intelligence to control society itself. Beyond that moment comes "the slave band"; a reality to be worn in order for you to buy anything you need to survive. Fail or simply be selected for death; and the slave band will either shock you/ or with a slight movement; it will poison those selected, and you are dead. So the question will become: can the prisoners destroy communications fast enough to survive? The answer is probably not; and even then if you survive for a time; there will be an army building more; and revolt will fail. "coming to a nation near you, as well". And the people will say: "we will revolt/ we will refuse". But alas, it is the army that will be banded first ("its just an experiment"); and if they don't obey the computer, they will be killed first. So with army enough; they can and will control the water, food, electric, sewage, and all things you need or desire. Live and be banded or die: take your pick. Not to worry if you refuse; enough data exists already, to search and find the vast majority of people on earth. With constant facial recognition, throughout the world, including on the highways: few can hide, from tyranny and outright hate. Because after all, in a world overflowing with people: all of whom, will soon face starvation and thirst. NOBODY is going to care about you. Not even as a leader! Alas, the computer is god now;

because artificial intelligence will recognize how to control the army. And banding will make that possible. Do you suppose they can incorporate a lie detector into that band? And the people say, "it takes a battery"; alas, if the battery needs charging; and the command is not followed; "well people are cheap"! Not to mention charging can now be done, simply by being close enough to the vicinity, of a charging station. In fact those kinds of charging stations can easily be spread throughout a city; so you never have to forget. Like the bullet out of a gun: once this is spread sufficiently to engulf a nation/ then a world (got to catch those terrorists); power will ensure it never leaves this earth. "You have guns"? Good for you/ "got food or water, or enough bullets"? In a world filled with 8 billion people "it takes quite a few"! Got fire, death to all: alas, you too, because there is barely enough to keep us alive with now. And that is more hope than fact. And the military says: "they will always need us". But with banding all the people or the vast majority and controlling access to every need through facial recognition: the computer does not need you; other than to band the children/ and families can be made to do that. Along with social media information: family can be threatened, and thereby forced to find anyone they are looking for. Even the police are discarded; because the reality now in place, will make controlling the people easy; or they die. The only real secured job, will be: to gather the dead. And with robots, that too can be replaced. Not to worry though: the universities promise to dry every tear. After all, you can't cry when you're dead. Don't worry, they will know when you're dead, and exactly where your body is; and what you were or were not doing (to a large degree). So, its all great to come, as in: "any day now".

We then look to biological hate, and identify how

many people can now create biological warfare. Remembering even the homeless can do more than light fires. Remembering just a touch/ just a dust/ just a single second, and your world or your health, has been stolen and destroyed. Because that is the choice you made as humanity on earth.

There is of course lots more; given the state of catastrophe that is life surrounded by threats. But why bother, as the universities: stole your brain.

Even that pales by comparison to the true world terrorists; who are trying to ignite this planet, with the same fire as is on the sun. A nuclear "let's burn atoms" reality, which will never extinguish itself. But then you don't care; "cause you're brain dead". Even so, everybody does deserve a warning: alas, this is all you get. Because unlike you, I did deliver the message; and the world said: "we won't care".

Chapter 9: Survival or death, is a choice/ but not for much longer.

While media propagation, and university expertise continues to say: “we are doing great”/ be happy, nothing to worry about. And humanity itself continues to say: “we sure as hell ain't going to listen to anything you say”. I remind the reality of youth in particular; that there is no going back, past the point of no return/ life will be dead.

So the critical question is very simple: what is the threat/ and what is the point of no return/ and how do we recognize them both?

The answer to that is: IN THE EVIDENCE OF WHAT IT MEANS, IF THE END RESULT OF THIS; IS NOT WHAT HAS BEEN PREDICTED! If in fact, the end result is so tragic and so predictable; that we do know it will be the point of no return. One such predictable fact is: that universities say, “we can ignite a nuclear fire/ and it will just extinguish itself; because there is not enough gravity here on earth to sustain the fire”. That will instantly be proven wrong; and nothing will stop the fire from spreading to consume this earth. Here is a religious prediction certain to be wrong: that the rapture so called; will be great “we don't have to die/ but will just float off to heaven” in the last days. Instead a nuclear fire will have greater suction than anything known on earth to this day; and that suction will grab and suck into the fire human beings from great distances away. So its only half wrong: yep you do get to “float off into the air like a bird”/ but you are going into a 10 million degree fire; and that ain't heaven. Still, the fear of universities; drives humanity to say: “lets be blind,

deaf, and dumb/ lets wait and see". Because the universities can ridicule and humiliate us with their words.

While there are literally "a thousand different threats of extinction; within the next few months or years". Nothing is more certain than mutilating all of nature through genetics. And nothing is more certain even than that; with the ignition of a nuclear fire. Which is exactly what those who claim fusion, are trying to do. Use an appropriate lens/ use an internet video of the sun: and prove that what exists there is not a nuclear fire. Which is in fact, the only proven source of energy that is, or can exist; as the fire being released. Everything else is fantasy, and has no basis whatsoever in fact. Which means the extreme experiment is destined to fail; the energy released will be exactly what is on the sun: which burns the bond in atoms that creates the mass of both life and universe. That failure is then certain to turn our planet into another sun/ and that sun is certain to reshape or destroy our solar system. A chemical fire as is seen on earth: burns the bond holding molecular structure in place. More specifically the fire on the sun is basically the same difference as is between dynamite and the atomic bomb.

So, as the decades have pasted by: I repeatedly asked for an investigation of the facts, prior to doing these experiments. So that we can all decide if their deliberate actions are worth the price of being wrong. Every single courtroom that has jurisdiction: failed to accept, that the universities are not god, and they can be wrong/ and the price of being wrong is we all die; by atomic fire. Every single one! All the various policing agencies were notified; and they all chose to assume "I must be a terrorist" because nobody is allowed to

question the universities or their actions. Military agents of this USA were notified, and discarded it; because they believe in weapons; and that is all. Religion was notified: and they screamed, "the universities are god"/ and I am nothing. Along with GOD will never let that happen; even though the bible for instance predicts that it will. Which then causes them all to say: WELL obviously we don't have to do nothing, because it is then decreed, and can't be stopped. Even though that is not what prophecy is. The media laughed and ridiculed; because they are "the priests of universities"/ and cannot be wrong. And the public was contacted in various ways; but being driven by endless greed and want regardless of the consequences: they had no eyes, ears, tongue, or brain to conceive of anything but a trophy. Therefore having made your decision: I do surrender you to the consequences of your choice. As it is impossible for me to change a world/ that can only change itself, to save itself. Even though every other life, and every future life dies with you.

Your only option to survive is dramatic human change; and the acceptance of truth and reality must lead/ the consequences of being wrong must stop extreme experimentation and more. Because human want cannot sustain our lives or world. Alas, there is nothing left of your existence, than want; which means you're dead. Even so, the young must fight for themselves or surrender to extinction. We grant hope, by letting female lead; not because they are better (they aren't)/ but because they are at least different; and we absolutely must have different than this. Simple and plain, there is no other way. That is done by making the laws for ourselves, by public vote; and removing all other laws that exist; as reality allows for that to be done.

Chapter 10: What it takes to survive, even though that is now nearly impossible.

The chains of life, the resources, the oxygen, water, food, planet stability, and everything else under attack by human existence and its over population; along with the extreme plague of universities destruction: is beyond doubt. As the evidence does prove; just open your eyes, and think; even for a single moment, and the cost of being wrong; will be plain. The cost of failure to change will be extinction. While the universities did in fact contribute initially to life and planet, “it was without balance; and all the low hanging fruit has been picked”. The politicians and more, made sure of it. What is left has been to attack the limits and boundaries of what keeps our world and our nature “safe”. Because anything less ends the university description of “yes we can”/ along with their job, pride, power, and more.

The legal action is: by constitutional law, “the supreme law of the land”. WE the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this constitution for the United States of America.

Supported legally by: the first amendment redress of grievances/ and the fourth amendment providing: the right of the people to be secured in their persons, houses, papers, and effects against all unreasonable searches and seizures, shall not be violated.....

THE very first; STEPS REQUIRED.

We then begin by understanding what it means to change the realities of our world, for ourselves. And are immediately confronted by those who want power, and therefrom slaves/ resources/ & more everything; than they want life (or so they think).

They do utterly refuse the reality of evidence, the consequences of being wrong, and avoid all truth that leads to those things, literally as if it were a horrendous plague about to kill them all. And indeed it is. Because change means that the power is going to be destroyed as much as is possible for human life on earth to do. Your leaders grasp that concept, and absolutely refuse it; which means they will war to stop you from attaining survival. Even though it costs them their own. Because they will insist: this world cannot die/ "they forbid it"; the universities are god. They can't be wrong. They are gods, and they cannot be questioned; because nobody else is god. And since they control the power, the law, the constitution, the media, the universities, the resources, and the democracy; they control the people as well. Because to fight with them is an open rebellion against power. And it cannot be done unless your only true weapon is the law, the constitution, the resources, and the democracy; along with the power of we the people to enforce: **THERE SHALL BE AN INVESTIGATION OF WHAT CAN GO WRONG**, and how that shall impact life, and earth. Because it threatens us all; therefore **we have legal rights, that shall NOT be discarded.**

SO THEN HAVING DONE THAT: "LEGAL WAR" has begun. The enemy of the people is power. The power intends to retain power and control: therefore they will immediately attribute social unrest to me; as the easiest

solution to prove “he ain't god”/ and he don't know nothing/ and you cannot follow him. He has no credentials, which means he has no rights to assert any knowledge whatsoever.

BUT YOU WILL REMIND THEM, and yourselves: THAT ESTABLISHING A TRIAL TO PROVE WHAT CAN GO WRONG/ AND PROTECT ALL LIFE FROM THAT CAUSE; BY DEMANDING THE CLEAR, DELIBERATE UNDERSTANDING OF WHAT IS BEING DONE BY UNIVERSITIES AND OTHERS. Is nothing less than protecting our own world, and our own lives and our own nation: with knowledge. The universities demand they have knowledge; and before we let them gamble with our lives, our nature, our planet, our children, and everything that has value to us: WE WILL DECIDE FOR OURSELVES, IF THEY MAY **OR MAY NOT PROCEED. It is our choice, because it is our world; not their own to play with.**

Nothing about that is a participation with me, as I am only the messenger telling this world of humanity: that being wrong is the end of your world. Because nothing is more clear. Nothing is more plain. Nothing is more certain of gambling with our world: than the ignition of a nuclear fire “just like the energy released from the sun, here onto this earth”. THEREFORE, the investigation of consequences: shall initiate on these experiments. And the universities and others shall establish their knowledge, define their understanding, and establish the wisdom of their actions. Along with the realities of what it will become: when an energy released does not do exactly as they say it will. Such as: how is your decision to “bet our world” stable; on the grounds that such an energy will in fact simply extinguish itself. When the instantaneous release of that ten million

degree fire (four million times more than a chemical fire); is certain to create its own self sustaining plasma from that second on.

The entire theory of universities with regard to the sun is: based upon fantasy. That is my participation. But the entire cost of being wrong, when bringing the same energy source as is on the sun here to this earth: IS OUR PLANET BURNS JUST LIKE A SUN. killing everything, including me. That too, is my participation, and legal right to be involved; just like every other living thing on this planet. Only their theories, which are based entirely on fantasy; stand in the way of stopping this “terrorist plot of extinction against life on earth”. So the reality of trial is: to demand that the universities clearly and distinctly explain in exacting detail: exactly what those theories are/ and **why it is, that we the people of this earth should allow them to gamble our world: on their theories.**

They will then lose. BECAUSE, you will insist: that no “foreign to the public language”, and no math “beyond common mathematical communications” shall be allowed.

THAT then leaves the endless array of other universities experiments that do and have endangered our world, and our lives and everything we depend upon open for trial. Thereby we let the entire world of public inquiry: be dependent upon the very most dangerous universities experiment ever designed. Which is “lets bring the same fire (energy source) here as is on the sun”. If the universities win, and the public decides YES WE SHOULD GO FORWARD WITH THIS, risking our planet/ then so be it. And all other legal or public inquiry is dead. You chose: reality returns/ or their fantasies and failures to respect life and world remain!

IF HOWEVER the universities lose this trial: THEN EVERYTHING THE UNIVERSITIES ARE DOING, is entirely open to public review; and nothing shall be done/ nothing shall be allowed to continue: UNTIL the public has been legally informed, and given the legal right to decide the fate. OF ALL the consequences/ the costs/ and the realities of university invasion into their lives. No more games, only truth and reality, and the potential cost of being wrong. Because we cannot go back in time; once past the point of no return life is dead; and we all know what that literally does mean, in time or body.

Chapter 11: The second step in survival, beyond the elemental demand for investigation of consequences; to the reality that “university is not god”.

The very first cause is: that destroying the limits, balance, boundaries, disciplines, resources, order, respect, values, hope, dignity of life, happiness, and all the other realities of life that universities are discarding into their sewer of failures. Is NOT a valid cause of action to let them sustain their work.

The legal action is: according to the US constitution article 6.2 “the constitution is the supreme law of the land”. And amendment 1: the separation of church and state; the right of legal redress by the people over their employees. Proven in violation thereof; by the religion (unproven by fact) evolution being distributed throughout society, and in particular throughout the public educational system to which all students are subjugated.

We therefore approach and demand of their religion which is evolution: to prove itself in public debate/ with absolute clarity, by allowing each and every principle of that religion to be examined for truth, and accuracy. Thereby establishing the critical truth: that our democracy here in America: does not allow for religion to guide our way. Religion is: “just believe whatever we tell you”. Religion is: “just accept our book is correct”. Religion is: if we follow these rules, “yes we can”/ we get whatever we want, for an eternity. Religion is: the value

we have placed in these leaders cannot be questioned. Religion is: we must all follow in the same way, believing the same thing, and understanding the same words, so that our participation in this herd, can be identified as "us, or me too".

The foundation of questioning this particular religion is very simple: with this religion, the universities have destroyed the opposition to their mutilating life on earth. Nature itself is the building of a body called life. All agree, that is being done through the existence of DNA and its binding genetic structure as does control that process. To remove the religion, is to remove the right: and return life to its proper place of THIS IS SACRED, AND YOU SHALL NOT TOUCH IT FURTHER, for any cause or reason. That is the price of being proven wrong. The religion of evolution decrees: that chaos built life at the beginning/ that all life is nothing more than continual accidents "which turned out just right"/ that all life was built one piece at a time/ that life has no value beyond time/ that creation itself, which literally means "thought did this"; cannot be correct, because they insist no brain (thereby no such functions) could exist until last.

These shall be the primary elements of trial: and they will be required to participate as more than just saying adaption did it all. Without thought there is no recognition of adaption or life/ therefore it fails.

Chapter 12: The realities we must meet and accept, in order to survive. If there is true and dramatic change enough, to make the future possible.

Only truth survives; which means the currency SHALL be driven back into reality; so that none can take advantage of the rest; by inflation, fraud, or lies. That being done by open public trial: it is our money, our nation, our democracy, and we will decide what is true/ and determine how this shall be fixed. As best we can by public vote. The method is a return to pre-2015 accounting by the federal reserve, and in particular its table L.5 total liabilities and assets of this USA. Identified by how these numbers interact as a reality by constructing an appropriate “divided equally this number means to each one of us involved” the following.

Only truth survives; which means every resource will be accounted for along with an accurate as best we can description of how long can we expect this resource to remain usable to our world. What will happen to the children, and other life forms as well as planet; when this is gone. The method is: a clear and certain picture of our world, our future, and our cost of being the way you are.

Only truth survives; which means as a world, we will identify as best we can the state of the oceans of our planet, and the cost of being wrong; whereby the very foundations of what keeps those ocean's alive has been attacked.

Only truth survives; which means, not only has habitat, thereby extinction a primary relationship to the loss of forest lands/ the reality of our atmosphere is, that

unless it remains attached to the planet mass and continues to circle at the same speed: the wind will make this planet uninhabitable; and we cannot go back in time.

Only truth survives: means, that our drinking water supplies are in great danger of failing us all as a world; and that cannot be allowed to happen. Therefore every possibility to protect that water shall be assembled and the cost of being wrong shall be laid out; so that all the people say, “we cannot deny this is true”.

Only truth survives: which literally means, that oxygen concentration in our atmosphere is essential to life itself/ and every fire humanity makes takes oxygen we, and all the rest of life needs. That fact isolates the truth: that changes must be made quickly; because we cannot allow this cause and effect; to be wrong for our world.

Only truth survives: which literally means, as the planet warms due entirely to the cost of human fires/ our ability to inhabit this world cannot continue. As is plainly demonstrated by “ice in your drink in summer”. No ice, it cannot be cooled and remains warm or hot: the planet is no different than that. The reality temperatures over 150 degrees are coming.

Only truth survives: which means we must account as best we can for the “chains of life” that we do know of; even though we will not know at least 90% of everything that does mean. We must error on the side of NOT being wrong. One of those chains is the loss of a base food source as is happening in oceans, forests, rivers, throughout the world; and that includes insect losses. Which do form a necessary, base food source for a wide variety of diversity. The endless extinction that is entirely caused by human choices.

Only truth survives: that means we must accept the limits and boundaries of human population as is consistent with our finite world. Because we cannot go

back; it all stops here. War is no answer; and that means without doubt or question: only women will answer this question/ and men will pay accordingly.

Only truth survives: the reality of our own food supply is in doubt/ land is being altered/ livestock, fishing, poultry, is being confined/ plants are being sterilized/ species boundaries destroyed/ diversity is being cast into the abyss/ and our dependency on just a few tiny elements of what we need: jeopardizes our human world as well. Because a single disease can destroy even a small amount of what we need; and that now becomes starvation for a billion people or more. And that is war.

Only truth survives: in the realities of government, by discarding power/ to prove we the people are owners here. Power is the great failure of any society/ and as has been constant throughout history; the few take all the power they can get, and are followed by the army that wants more for itself. The critical decision is then: to destroy the accumulation of power into the hands of a few/ so that all can benefit from life and nation. It is limited capitalism (we the people will vote upon the maximum and minimum levels of income per year), and limited weapons (with world law and world policing) which accomplish that goal of life, nation, and world.

Only truth can be allowed to govern education; nothing more or less/ with a special emphasis on if we do not truly know. Then we cannot commit to the belief that we do. There are no theories in truth, it is only “what reality can be proven to be without exception”. Within that truth, NO EXTREME EXPERIMENTATION of any kind; as is guilty of threatening our world, our nature, our lives, and our future, our everything. CANNOT be done, without breaking the law; and asserting, by that proof: as is, “terrorist”.

TRUTH ADMITS: that the government of this USA, is the constitution itself, along with the two distinct support documents which made this nation possible. The declaration of independence/ and the “Virginia, bill of rights.” NO EMPLOYEE is the government/ nor can any agency of this USA OR its states declare themselves to be “the government”. Because beyond the constitution, our government is: WE THE PEOPLE; and that foundation relies upon the truth: that it is a proven rebellion against this USA, when any employee fails to recognize that fact. No court holds the law over us/ rather this democracy holds the law as governed by our constitution over the court.

The employment of the people identifies with: our need to survive first/ the balance of what can be done, is then governed by who has the right to do that work. The critical reality: we all have an equal right to “survive first”/ and that grants the demand, that a job, with a real (we can accept this as our own) sustainable wage; is our inherent right. Reality then demands: the future has rights over resource just like you/ and the inherent sharing of those resources does govern what work can be done.

The resources of our natural world, are a value which no man or woman has made; and that includes the body you inhabit; even if you have participated in the outcome. That critical truth aligns with: we don't own, what we didn't create. Or more distinctly, the natural resources belong to us all/ the human participation that makes any resource financially valued, or demanded, and available does not. Having thrown vast resources in your garbage mountains: what is left, is then distributed according to reality; to be spread out over the centuries humanity expects to live. Because it is a finite world, there will be a day when the resource we need is gone. Therefore, failure to share or care, is the execution of a child.

Chapter 13: To govern ourselves, we must learn to respect each other.

Nothing is more diligently a “loss of humanity” than is hate; the visual reality of death walking. Nothing is more diligently “the value of life” than is love: the creation of happiness through hope and trust. Therefore what is to become a better world, must separate these two into their own distinct environments. So that hate can be with hate. And love can live with love: because they are true opposites of heart and life. Anger “can be fixed”.

Nothing is more human, than a need to talk; thereby interact and establish contact with each other. That fact isolates the majority, because they have no conversation of merit to add in to a conversation. To build a relationship upon what I can contribute to your life. Therefore the primary foundation of all public education; needs to incorporate these valuable tools; so as to eliminate bullying, isolation, and depression. Establishing the basis of friendship and acceptance for all.

Every subspecies of human; is a value unto itself, and as such comprises its own distinct group. Every subspecies within that group also comprises a its own distinct group, as is consistent with a specific religion for example. While true love has no distinction for groups; the reality of living as human does. The end result of that is: while you might or might not like to play with each other/ when push comes to shove, each group will divide into its own. That fact isolates every minority, and with desperation comes war. The end result of that is: as is constant in nature, each subspecies is better off on its own. Whether you like it or not, reality and survival go hand in hand. Do you not choose “family first”?

The discipline of knowledge, the value of order,

and the balance which completes our ability to be wise; are all formed out of what we honestly value most. Truth provides: the greatest value of life and living is love. Yet the greatest reality of survival is thought, and its ability to conceive of a future. To form thought is then the purpose of an education. To use the value of knowledge, is conceived only by truth. To assert that order is necessary, identifies the creation of a decision. To balance that assembly of purposes or desire constitutes a direction. Therefore these are the elements that must be taught in schools.

The foundation of business and industry is an acceptance of the facts that will determine the outcome of our work, and our future. There is no want in those facts, as lies never survive. That makes reality by its own truth, the creator of our working destiny. To assemble the truth about what our facts of living will reveal, constructs a valid mapping of where that business or industry needs to go.

The critical nature of law is: that wherever justice can survive, the realities of society will create peace and harmony through happiness, as freedom is cherished, and democracy is honored; but life is ordered with discipline, and fair play. To achieve that relationship of life with living ordered by truths we do cherish: hate must be removed, and anger must be fixed. To participate in that reality of choices; the courtroom shall be opened to full public view at all times it is in session; where there are no closed doors, and everything from the moment it opens to the second it closes is plain and clear for the public to see and understand.

The fundamentals of healthcare are very simple: none should die of “minimal causes”/ yet all must accept death as the price of life, when nature clearly calls. There is no acceptance of business in healthcare; because life is more valued than that. There is no acceptance of business

in pharmaceuticals; because what we can do for each other is more important than that. There is no acceptance of controlling the price through controlling the competition; as is the failure to educate doctors and all such things; because that is criminal in its contempt for life. There is no reality of work, that does not give back in accordance with what was honourably received; which means all are subject to a percentage of income, as is “fair play”.

The tragedy of power is: that those who attain it, are constantly trying to gather more power, by consolidating that power with others to control one thing, or everything society needs. That is done with money, or weapons; and armies follow because power divides society into: one side (have) or the other (have not)/ you can't be on both. Therefore limiting capitalism controls the money/ limiting weapons controls the armies/ and limiting consolidation controls the force of those who intend to own the resources you need to survive.

The tragedy of universities rule; is defined by “hundreds of fantasies, & failures” to life and planet. Not the least of which is: to design society for use with the automobile. By consolidating work into a factory/ get a vehicle and drive. Buying or selling into “warehouse store. Which then requires a vehicle and a road to go purchase what you need. No neighbourhood schools, and so on. All of which ends with much greater pollution and resource losses, and strife; than is necessary to sustain.

The foundation of our future rests entirely upon our decisions: to correct the tragedies of what has been done/ and revise human existence on this planet in ways that will sustain our future, by protecting nature and this earth. Not the least of which is to insulate/ replant/ rebuild/ recycle/ stop the pollution/ and much more. While society screams: HELL NO, the reality of our situation is: HELL or YES! That level of enforcement for life and child; is then up to the people to enforce on themselves, and each

other. It is a choice, with consequences.

The value of religion, the value of marriage, the value of friendship; are all elements of a society that is working towards a goal of peace and harmony. Wherein all major religions “except university driven”; seek the betterment of society; by offering advise which has aided the generations (or they don't survive). The value of an “honest, sharing, and caring” marriage refines life and living into a balance between the sexes, because anything less; fails the happiness, and hope we were all meant to have. The value of friendship; is a self sustaining relationship with life and work as it was meant to be. The blessing of a partner to share our burden together/ a great many marriages fail that level of friendship. And a great many religions take the easy way out, and just say “its easy/ you don't have to do nothing”; but say a few words, leave a little money, and “show up to church”. Presto, like magic; you get an eternity of riches! It ain't so.

That brings us to the spiritual essence of life itself, and by design the soul begins to understand: that our lives here mimic some of the basic elements of existence that we will face beyond time. To be free, requires discipline, balance, and order; as well as thought. Or in a relationship that is at energy levels we cannot conceive of: you are instantly in trouble, and facing death by extinction; for a second time. What mercy gives, is dependent upon you. What love can be, is dependent upon you. What your destiny is: is dependent upon you. Therefore the time to decide what your own eternity is going to be; starts now, and in every second from the day you are born. That is what truth indicates; because freedom is the right to make choices for yourself; and bear the brunt or reward; of consequences that you did choose.

Chapter 14: A summary of choices.

I am not your leader, I do NOT threaten you in any way, I spent the last forty + years demanding DON'T DO THIS: and thereby you cannot blame me for the choices that you make or made. I am the messenger telling you that without change the evidence has convicted you of failing both life and planet; and without subjecting your universities to trial: your entire world falls into the abyss of all things HORRIFYING. BECAUSE that is what they chose for you and them. **Reality proves it true: I merely present you with information. Whatever you do with that information is entirely your choice/ your decision/ and your consequences, as chosen by you!** YOU chose to hate truth, and hide. YOU chose, to worship greed and bribes; running away from reality. YOU chose, to destroy a world; and discard all respect. YOU let the universities describe nearly every threat of extinction that exists; by their choices: to play god with life and planet. YOU said; "not in my lifetime"; let the children pay: choosing to assassinate them by destroying their future. And here we are, "life or death"; with very little in between, our ability to survive; and the death which now surrounds us all. If you run away again: you run into a burning house, to hide in the closet of your own making. CHOOSE BETTER.

You cannot live by or for want anymore; because that is what brought you to the level of threat, that is now going to make you extinct; if you refuse to intervene and accept the responsibility required to save this earth and its life. TRUTH MUST LEAD, and nothing else will do; or you fail. All must agree, and accept that reality is: the summary of its truth, by the evidence we can prove/ or

the risk, that has been established.

We CANNOT BE WRONG, by letting those in universities decide what our future is going to be anymore. The reality of horrendous failure is constant and true; from mutilating nature, to intent upon igniting plasma into a nuclear fire, to the destruction of planet, and all its resources, to the failure in chains of life that sustain our survival, to oceans lost to its life, to overpopulation; and a thousand more at least. WE MUST AS ONE PEOPLE CHOOSE FOR THIS WORLD. Because nothing less will offer a sustainable result. But that is for you to decide, not me.

We can resurrect the reality of government by democracy; simply by choosing to vote on the laws themselves that then govern our lives through constitutional oversight. Rather than voting for someone to vote for me/ as that day is done.

We can remove all weapons of mass destruction: by creating world law to govern our leaders, and our world. Establishing a world policing force that is dedicated to bringing any leader that breaks our law into world court for public view, and judgment; around the world. We can limit all weapons for the military; because as one world, we are literally the greatest human force on earth. We are the military, and we are the people who support the military, or cause them to fail: they need a bill of rights, to insure no "general can threaten" beyond the limits set by society. As does both; individual society, and the police individual; so that both agree and understand what is allowed by ourselves; rather than a university derived whore.

We are not leaving this planet for any other place in the universe; time will never allow it to be true. And that means: EITHER YOU WAKE UP AND SAVE YOUR WORLD OF LIFE / or it all disappears, and takes you with it.

To learn how to sustain your life, instead of being restricted as the universities do: to irrelevant actions with a computer, that grants you nothing or little with regard to life and living: is wrong. To learn how to sustain your life is a basic purpose in living; and we need not only the tools to do so, but the opportunity to search as best we can; for what will then become the future that life can give.

We then approach GOD, OUR CREATOR; as a world to ask: WILL YOU PLEASE, give us an opportunity to rebuild a new way of living with respect for life and planet and all that is true: INCLUDING YOU!

Simple as that.

There are seven decisions that must be made to change this world.

1. Everyone is equal; and that literally does mean; every person in governmental employment; is simply a person just like you. The only difference is: they are required by law, to do what that law says for the purpose of honoring and obeying the constitution. Your job, to participate in society, is less strict; because their job requires a sworn oath to obey that law. Redress of grievances is the method of removing or challenging those who do not keep their oath; and every employee hates that law. So they hide it.

2. Fear will save no one, because the threats we face are entirely world wide; and will cause extinction for all life if we cannot defeat them. But since we as humanity on earth are the cause of these threats, or the people that allow it to be carried out against life and planet: we are the saviors of ourselves, which requires "life as it was"; as well. You CANNOT HIDE from realities which destroy everything; as is the ignition of a nuclear fire/ loss of resources/ mutilation of nature/ overpopulation/ etcetera, and so much more.
3. Knowledge without purpose drives fantasy, and tears holes into the very fabric of life itself: a constant of university knows. True knowledge is the essence of value which shapes the life we can lead, and identifies the construction of our future, by the passages reality will create. The greater your own knowledge base is, the more functional, fundamental, and true will be the value of wisdom that you have earned. Nobody gains life or living through chaos; the scourge of fools as is evident in evolution, a blind sewer of death. The value of life gives truth the right to lead. The failures of humanity let universities lead instead.
4. Love lifts us all into the joy of our existence, to express and experience what true happiness is. Because love is the essence of our own values and desires shared, within the environment of another life who cares. Love requires participation to exist; because it lives in the excitement of an entire universe of hope, in all things that life can become. It is the essence of peace, the foundation of harmony, the desire for

justice, and the discovery we can live for an eternity, because life is worth living. The presence of GOD is worth everything; therefore trust exists.

5. Truth alone survives by the laws which keep it alive. Every lie will fail. Every fantasy will destroy something. Every prisoner of self; is a reality of death/ as displayed in the grave. Truth lives by accepting the limits and boundaries of law. Law lives by understanding, want has no place here. Justice rises to achieve respect; only when it is true to the purpose and desire for, or from which it rose.
6. The difference between those who can, and those who cannot; relies upon the evidence of reality, the decision to order life by the framework of discipline, and then balance that living with the truth of what we can identify as “our choice”. Anything less will fail. Which does mean: we must face our reality together, and accept the cost and the truth of democracy is, “let our own decision matter”. Thereby taking control over the courts, the currency, and the government; by public redress of grievances through first amendment constitutional law. To make the changes we must make. To decide the future we must live. To prove: we the people shall decide now. By our own vote, having been informed through public trial: to investigate our reality, the cost of being wrong; by the evidence formed in law. Money is merely a promise; therefore it is the promises that disappear in bankruptcy. Nothing more or less. In contrast to that are the extreme experiments of universities and others: that

threaten our world with extinction. That is the great tragedy; while facing broken promises, is little more than accepting: whatever you want is not enough. To those over 30; it is you, who broke the promise to yourselves, by refusing reality for greed. Destroying the future for each child you then said: "they will pay/ not me". Or more simply: GIVE ME LIES, AND NUMBERS WITHOUT REALITY. Which does prove, "numbers are the biggest (non-human) liar of all".

7. **Respect is, the acceptance of truth: the environment, the value of law comes first. Therefore beware of what you believe. FACE YOUR TRUTH, AND ACCEPT THE PRICE OF LIFE; or you will lose this world.** And every child will curse you/ and your whole world, will die forever. That is the cost of "university knows"; and playing god. **Without the slightest respect for consequences!** Producing a world, that is exactly what you wanted it to be: a reality of greed, power, and pride/ freedom without restraint. **Want is: the foundation of every lie; your lies, are showing! Your world is dead, without true change. So says the evidence that can be proven true.**

In summary of me: I did not desire any portion or part of the world that you chose for yourselves. Spending forty plus years trying to make you understand: THERE ARE CONSEQUENCES FOR WHAT YOU DO. Only a very tiny few "had ears"/ all the rest either ridiculed, or ran away. I do NOT find any portion or part of our current situation desirable; nor do I find "I was right" of any value whatsoever. Because our world is now dying, and your decision is the only thing that will save us. So, I say to you

climb out of your grave! And you reply: "the universities are god"/ and they cannot be questioned! Alas, the universities stole your brain; as all that is left of it: is cult worship, bowed down because they have "more words than you"; of the universities playing god.

Unlike you: I know this world can die, it is not a magical place/ it is the validation of thought, and its existence by truth. Remove truth, discard thought, destroy respect, and pummel life and planet, raping everything you can touch; and guess what: "its then not alive any more". Unlike you: I am NOT blaming GOD or demanding that "GOD" will save us from ourselves/ we were given free will; with the demand to accept that price of choices. Unlike you: running away will not help; every threat remains. And will soon overrun all possibility of change. Making a later decision by you; ABSOLUTELY WORTHLESS. Now, or never; make up your mind! Stand up and be counted/ SIGN YOUR NAME, to say I AM HERE; and do the work, YOU CAN legally do! Fear is worthless. **Either we live, or we die, as a world.**

If we lived in the world I would have chosen, ***carefully identifying the consequences of every choice, by truth; before it was made/*** then we could have lived in "a happy, happy world". **That is not what you chose; your lies fail us all/ your want fails you even more; because that stole your world, and mine too.**

Regardless of how or what this world is to become, or end: the reality most important, is eternity. That said, the invitation to eternity exists only for those who desire it enough: to be identified as soul.

Soul means, that you have achieved a relationship with GOD , by accepting the miracles of creation, are enough to prove: "thought works in you". By accepting

that love is the most valuable truth in this universe for you. By accepting truth must be obeyed, because everything else will fail. By respecting the value of life, and the absolute superiority of GOD, OUR CREATOR. By trusting that faith, with is an acceptance of the evidence that is within our grasp; is enough to expand beyond time, and even enter eternal life. All those things, are not free; and must be desired by you; or you fail life itself. Life means: the value of living, has borne a desire to create even more, through love. Therefore love expands the destiny of heart, to achieve the essence of everything life in time can become. While heart means: to care enough, to share. The value of love itself then comes to express; that our experience here as time, completes our soul, when we earn the right, to identify ourselves with that love.

If these definitions have no value to you, it is because you do not belong to the GOD of LIFE.

Do not assume voices. Do not assume instruction. Do not assume, that it is not your job to choose for yourselves; because it is. Our truth, is identified by our choices; as a reality that is evidenced by our lives in time.

Peace lives in truth, harmony lives in trust, love lives in hope, discipline lives in courage, order lives in respect, and value knows the meaning of truth.

Simply do the best you can for life, no one does better than that/ even if, 40 years becomes "less than it could have been". That is not for you or I to judge. Our purpose, even our desire; can only be, "I did do the best I could". Not perfect, not without flaw or failures; simply "as me".

Chapter 15: The seven decisions that cannot be avoided anymore.

1. Will you save this world and all its life, by refusing to gamble, disrespect, or throw it all away? By investigating the cost of being WRONG/ and choosing for life and world. By choosing to keep the future alive so every child, and every future child or life, can find happiness? By opening every closed door, and turning on every light: so that nothing is hidden anymore. Take a stand in the law: and demand our legal right under redress of grievances is: YOU OWE US THE TRUTH.
2. Will you accept: that the law rules over everyone the same, which is the foundation of all government. Anything less is a rule, and rules are commands/ not laws. We need very few rules. We need very short and concise laws; as is evidenced by US amendments/ or the biblical ten commandments.
3. Will you do the work: that proves, we the people shall rule over ourselves, by creating our own laws. NOT by voting for someone to vote for me/ but establishing the words, and voting for the purposes and desires, that then become our future as life on earth. By taking control over government, and its employees: with law!
4. Will you choose limited capitalism: thereby eliminating the curse (we did this to ourselves) that is allowing power, and pride to be accumulated by a tiny few. This is the vote, to

establish: we have rights, and power too.

5. Will you construct a life without want, so that the realities of truth, and the consequences of justice can define and create a new society, and with it a new world for all this life on earth. Truth survives, and will build; nothing less can.
6. Will you save this world from men, and their weapons and their pride: by establishing world law as chosen by we the world over our leaders. Enforcing that law on our leaders, with a world court; by “soldiers of the world, including ourselves” policing organization; that will NOT be allowed the opportunity to threaten our world. Because every single one of these agents of change, shall be replaced every two to four years.
7. Will you respect the life and time that you have been given? A reality of value so extreme in every single miracle of life or planet; that nothing born human, can even conceive of what we really own, as an independent body of life, or as living on this world? The potential of eternity as well. The value of time is choice/ the reality of choice is learning the cost, reward, or consequences. The value associated with eternity is love; because nothing less makes life worth living, “forever”.
8. We now **assemble the elements** of what reality will prove true.

In America one million people is just one out of every 300-400 people/ and if you cannot assemble that many to claim: we are a democracy/ we have legal right; life on earth will fail. They are one, we are many. They believe in power, but we are that power, and can take it away. They assume ownership, but we are the owners, of our nation and world. When united for life.

To stand on the courthouse steps, throughout a nation, en-mass; is to show the tiny few individuals inside, that our vote has power too. We will control the courtroom, by public surveillance of every trial; and a grading system by which we protect our laws, and our courtrooms; for ourselves. By removing any judge or attorney or other that fails our constitutional (we have a contract) government.

To establish the constitution is our government/ NOT the employees. Is to take away their power, and lay our future beneath this foundation for and of all law; so as to prove "yes we can". To earn that right: is to insure justice, by truth, shall be our way.

To stand with the law, is to bring a weapon of value, that can and does shape a nation or world: is to prove, our guide, our desire, and our purpose is / not war. Rather to ascend beyond power, is to achieve what our truth can become.

The correct and true demand is: that we shall own a moratorium on all extreme experimentation, to stop the universities and all others from proceeding until we have had our investigation; and fully understand the consequences of being WRONG. By our vote as a nation or world, we the people shall then decide what will or will not be done with our nation or world, its nature, or our

resources. The value of life and planet/ or want, as is the reality of this day.

By our decision: what can or will happen with the currency and the bankruptcy of a nation or a world/ shall proceed in a public courtroom; as we the people judge for ourselves, what our future can become. By deciding the future of debt, and the realities of ownership. The decision of tax. The reality of currency now. And the decisions that will become, "our new congress, and its redefined job".

By our decision: the right to declare war, shall be taken away from leaders/ and placed into the decisions we declare as a nation to be our choice. The reality is: the military shall defend, upon an open declaration by those in government; with equal or slightly more critical assertions/ against what has been done. But they shall not attack, until the nation demands it to be so. Let the world know, this shall be so.

By our decision: the rights of all power will become limited, by our vote. Proving to all: that true democracy has come to this world. **BUT, IF YOU DO NOT govern that freedom with truth and reality**, as the evidence will prove; justice will die, and this world will be incinerated by all things called "HELL". A world of humanity unleashed to take all it can get: is extinction.

THE WARNING IS: you cannot go back in time. MAKE THE DECISIONS, THAT WILL LET YOU SURVIVE WITH TRUTH, RESPECT, AND VALUE. Thereby "BECOME HAPPY". There are no second chances, choose correctly, and accept the price; no going back or life and planet fail.

Life is not a game, all who believe it is lack a brain. LIFE IS: a journey into the decisions that form a quest, to

identify desire (I live for this), truth (I survive in this), love (beyond self has true value), respect (I worship truth), courage (the essence of, my heart lives on), hope (with all I own, value lives here), balance (together, as male and female; we make one), discipline (this is worth the price), order (we ascend from knowledge), value (I understand life leads by truth), acceptance (trust forms and binds relationships), and thought (the journey into destinies, through an open door called "spiritual miracles"). To achieve the destiny promised by our own existence, truth builds trust. "That we are in fact, much more than body does reveal"; needs little more than a brain, to recognize everything about this world is a miracle, formed by a Creator, beyond ourselves. WE, did not build this world, nor did humanity participate in anything that keeps it alive. We barely keep ourselves alive, if anything goes wrong. Time is a distance, measured by your own values. That is different than: life is a recognition/ an existence, created by thought, an elevation beyond moments. Death is formed in biological mass and motion. While freedom gives us motion/ reality proves truth has laws, that will be obeyed, to govern existence. Among them, a biological mass cannot be eternal/ it simply won't work: surrender it. Your life is your truth. Your values, identify your heart. Your destiny is determined by your love. Your purpose has a passion, or it does not truly exist. Your eternity is formed from "love/ apathy/ or hate". These are directions to the spiritual world, the consequences of your own truth or soul. Or lack of the same, because you never stepped outside the herd, to find your own true desire. To live, you must obey hope. To achieve hope, there must be a passion to your own desire, and your own ability to love. Or eternity has no place for you. Apathy will dissipate, and then disappear forever; even if "you change

your mind beyond the grave”.

The essence of human existence throughout history has been: whosoever has the weapon gains control. The universities have control this day; with weapons beyond the limits of what we can survive as a world. Today, in a world of 8 billion people; growing at a quarter of a billion more people per year. The greatest weapon ever achieved is the result of yourselves: you let them do it, and even called them saviors. But: Because they cannot destroy us all, without destroying themselves, they are tied until “Just one” escapes. That fact is true: we all die then. Reality will prove it without exception; none will escape, “this extreme arrogance of university designed wrath: playing god”. That, leaves us all with one single decision: do we let them finish killing this earth and its life; as is proven by the evidence of threat/ or do we the people intervene to save ourselves, our world, our future, every child; if we can? This: is one final true choice, and you cannot go back; because the threat of extinction is far greater than you can even perceive of. The basic foundation of every threat is: YOU DIDN'T DO THE WORK! In America; they all just wanted a bribe, and to pay for it, they all just said: “let the children pay”. But that would not have occurred; had it not been for the tragic existence, of university brains, who gave power to the politician and the military. And in return the politician and military gave power back to the universities; to control and bribe and build armies with inflation; that media refused to report. And the world followed, because that was easy: respect nothing, and claim everything has no price. Let's even mutilate all of nature. Let's even ignite atoms on fire, just like the sun. To your eternal shame.

We then approach religion to ask: WHAT IS, THE

TRUTH; as best we can know? Because this world has been divided, with what you want. The reality of living however: either accepts truth leads in all matters and ways; or you fail life and earth. **We are too many people, for any other way! You must choose. Or there will be no true peace! Find a way to remove what you want; and choose faith (truth teaches us to trust)/ not belief.** And the world says: "we want what we want"! And reality replies: the consequence for your decisions is HELL ON EARTH. So, if you just have a brain.....you will use it, and lift your face off the ground; to see the universities you worship, the hate you treasure; are not "gods".

The constant of "whores (just give me the money, the body of life has no other meaning), prostitutes (I cannot escape my reality), failures (give me lies, I want what I want), and fantasies (we can play god without consequences) in charge of life" has been: NOW, we sit on the edge of extinction as a world.

The constant of "university" is: yes we can, even if that means cursing the world, and destroying all life and even the planet; nobody gets to tell us no.

The constant of humanity is: "I want what I want, and I neither think, nor listen to anything but what I want/ or don't want." How dare, you not give me what I want. The end result being: a world economy, built on nothing but lies.

The constant of religion is: "let GOD do it"/ we can't be bothered to discipline or control ourselves. WE BELIEVE, in what we want!

The constant of government is: they can't stop us, if we can ignore reality, truth, and evidence.

The constant of media is: we are the people who make this world into what we want; by propagating whatever that is. Even if, “we have no right”.

The constant of education is: nobody can deny us, if we stick together and declare “we know”. The believer is then obligated to repeat it; not question it: as all cults do.

The constant of agriculture is: we want what we want, and nobody can tell us what to do/ until all that want adds up, into catastrophe.

The constant of industry is: we take what we want, and give nothing back, because “its only about the money”.

The constant of business is: get out of my way, I WANT to be rich.

The constant of a factory is: “throw it all away”, so we can make more, “with our robots”.

The constant of unions is: listen to me, we WANT to be richer, than all the rest who work. Proving how superior we are to, the rest of them.

The constant of pride is: only want matters.

The constant of power is: only I matter.

The constant of arrogance is: I am god.

The constant of human anger and the hate which follows is: more than anything else, a desire to avoid reality and the depression it can cause/ by focusing on something you can control. As would be “I hate you”/ etc. so then people use extreme anger and hate which cannot be forgiven; because it is their sanctuary from the realities which make them fear. A very poor choice. You cannot

save them from it/ it is their own choice, and their own decision: to save themselves from a life that is nothing more than the prison of your own worst fears. It is no game. Be a friend where you can/ save yourself when you must.

The constant of truth is: none of these things are true, to the values and realities of living life or planet.

Or more simply, “your university led leadership” has driven you down into the sewers, bribing with “all you can want/ without consequences”/ and it is now: rise by ascending into the values of truth, accepting the certainty of consequences, to every decision you make; **or die, because of the choices that have already been made.** As is the true consequence of hate, even extreme anger leads the way. Let it go, and surrender yourself to the values of living by law, searching for truth, discovering miracles, and ascending into the destinies of thought. You have traded life and living as friends; for toys, trinkets, and trophies! Was it worth your happiness or future? Answer the damn question: WAS IT WORTH THE PRICE? Is losing your whole world worth living in the cult of “university knows everything”? Because they are literally threatening your lives, hopes, and future forever. To which the majority reply; “we are doing great” nothing is wrong that matters. But take another look at your garbage mountains/ the level of resource loss/ the reality of pollution/ planet warming/ oxygen depletion in the upper atmosphere/ and a thousand more tragedies; which clearly prove the future of every child is dead. Which means, “your great”/ is their assassination. Your treasures, is their debt. Your wealth, is their loss. **Your world will not survive it;** and that does not even include all the catastrophe's waiting as “university knows extreme experimentation”. Your population density, will destroy

you as well: the list is long, and the evidence is true. Last chance to care, because there is a point of no return; from which time, nothing you can do, will matter. Death for our world, has then crossed the door: to take control over you. Was it worth the price of your trinkets, toys, and trophies: all of which you throw in the garbage just as fast as you can. Was it worth your child's life? Every living thing on earth? Even threatening the solar system itself, with university fantasies gone beyond insane, into the realm of arrogance so diseased: it becomes "Satan (destroyer of worlds)". To play god, and scream: no consequences for me. To your shame.

As has been true from the very beginning of my work. You have been asked to investigate to determine for yourselves, what the price for being wrong/ particularly due to the extreme experimentation's being done by universities and others will be.

I have proven: that their theories are based entirely in fantasy, and the end result of not defending life, resource, or planet is: YOUR OWN EXTINCTION.

With a single voice, you have screamed "we won't care"/ ran away to hide/ ridiculed without a right (because you proved nothing)/ or only a very tiny few at least proved to think, for a tiny bit if not more.

So, I tell you with the reality of evidence that is proven true: either change this world, or you will soon be extinct.

I will suggest to you: that the biblical prophecy of Daniel 12, "the countdown of days to the end of this world"; has begun/ and by prophecy, it ends in the spring of 2021. a 5,000+ year old prophecy based upon the prediction of what men and women do, or refuse to do.

NOT DECREED by GOD , by predicted of people. Which means: YOUR OWN CHOICE decides.

I will suggest to you: that the biblical prophecy of Revelation can now be viewed as truth/ and the first eleven chapters declare: if men continue to lead. While chapter 12 which divides, and predicts what happens if women get their say; in that day: now exists. It begins with “a spiritual woman, standing on the moon (something foreign seen since the very beginning of humanity)/ it is a man”. That man would be me; as I have been saying for roughly 14 years. They cannot lead as men did do. If women find their voice, it will be by law; and that law must seek justice, not power, as men did do. Or you fail too. The reality of that statement is not to be understood by you; it is spiritual/ but the effect is not; and as I have stated: has meant the difference between finishing this work, or turning to war, as men do; when all else fails. As is described at the beginning of Revelation chapter 1. a reality governed by what GOD can do/ not I. Balanced by “female inside”; the work returned too: it is not my job to save this world/ it is only my job to deliver to you the message; **change or this world will die, along with all life on it.** I am grateful, for your second chance; as the first 11 chapters of Revelation is the end of the world. What you believe, or expect matters not: what is true shall decide. The difference is: this is the best, men did do; and we stand at the edge of extinction. Women do deserve their chance to make a different decision, than war. Whatever that will be, is up to them! It is at least the hope, “we now have a chance”. Men are unprepared for that. Because women are different/ not, because they are better.

I do wish you well, but I do not lead: to make your

decision for you. I present information (you decide), from which you determine your own direction, and accept your own consequences. Which means you participate in your own future, your own eternity for life; or death of this planet. Not a game, a reality proven by the evidence.

I do NOT condemn you, or anyone: that is not my job. But make NO mistake, the evidence against you is massive, and the realities we now face; because you refused truth and reality; are literally, life and earth-threatening. It is by no means certain, that we can survive, even with your best efforts. Because your choice was want, and all its lies; have failed you. But if you surrender this world, your time left will be short!

The critical choice is: are YOU, or are YOU NOT, going to work for life and earth/ **accepting the price of our survival will become: only truth by the evidence of our reality, gets to choose for us.** No more want decides/ no more want gets to lie/ no more universities get to propagate fantasies, or determine the future, or control governments or education. No more “lots of things you now take for granted”; as is we can drive, we can release as much heat, we can do anything we want; by refusing to admit “there are consequences to every decision that we make”. And with 8 billion people all wanting to live on earth for a hundred years; **by taking every resource they need. Which makes: every individual life decision, MATTERS.** No more games, reality rules life/ not want. Or more seriously: whatever humanity on earth does today, when examined by the consequences of being WRONG/ affect us all. That destroys the border, and assembles the truth: that we are all in this together now! That we all have legal rights in any nation on earth: that has assembled the realities of extreme experimentation/ or

other realities of death; than can take our lives or our planet or our future away/ or threaten every child/ or kill the resources we all need/ etcetera, and more. We do have rights, and we do have a need: to save our world, from extinction by those who are too arrogant to care. Simple as that!

As from the beginning: regardless of what anyone says, this decision is not about me/ I am irrelevant to your choice. I am not your saviour, not your leader or your enemy. I am not your excuse, or your purpose, or your complaint, or even friend; I am in this matter, simply a messenger. Much like the person who delivers the mail. But unlike that; the reality of my education to do this work, has been far beyond what you believe it could be. MANY people could have done this job; perhaps some better. But regardless of that, I did deliver this message to life on earth: **EITHER CHANGE WHAT YOU ARE DOING/ OR, YOU WILL GO EXTINCT.** And soon.

Due to the education I have received, the reality of evidence in this our time: I do accept, that it is a message that comes from your CREATOR. Even if, it is merely delivered by my hand; "somebody had to do it"/ not a clue, why me. Not even one! I gave my lifetime on earth for this work; because the value of life is worth that price. The value of my education is far beyond that price. But then it has been a job, in the dimension of "you"/ that required what; "few would have wanted". As reality will prove, I gave "many people" the opportunity to participate and help me deliver this message. None "signed their name" and said "yes, I too am here": because this world is worth the price! Even if we fail, I will know: I did do, what we could have done. But alas, the herd does not own its brain; the leaders do, and they

don't care for life or planet or child. Just power and pride. Simple and plain; you are about to get what you deserve. Whether I or you, like it or not/ because reality does not care, truth is simply truth, and every truth has a consequence, if you break its law. But it also has a reward, that survives for an eternity. Search for your own soul.

As for me: I, live for truth not want; searching for wisdom, not perfection, as is not possible. **I, am** grateful for an opportunity to give back. Perhaps, that is simply enough; after all, "It's just a job, not a trophy". The value of that job is simply recognized by soul, a reality that cannot be measured; or honestly described; therefore, the honour of it remains "silent". Not because I desire it so; but because I cannot make you understand; what is true. You have no knowledge of the spiritual world, and very little desire. I would summarize my existence with the spiritual woman inside; as life divided through the middle; giving no preference to either male or female/ but now with female in charge. The reality is changing, beyond my control: I don't know how it ends. You will never understand. The foundation is about life, not body; a reality of education not unlike all other forms I have been subjected too. As is learn, by the truth of it. I am not a religious man; rather I accept truth by the evidence of our reality, and follow that path as best I can, to an understanding of its law. **THAT**, has brought me to **GOD OUR CREATOR**; through **JESUS** as is called **CHRIST**. The guarantor of our eternity; that we are not simply created, and left behind. That is my testimony to you.

James Frank Osterbur

11/28/19

The critical reality of life or death to this planet; IF YOU EVEN TRY/ is based upon a single principle. Choose life and planet comes first/ NOT just your life, but all life; because whether you like it or not, the chain of life is not so simple as a human brain.

Given that truth, the next section of values that must be attained is the reality of how we negotiate life as human to human to society; with justice. To achieve that, it is absolutely essential, that you do understand what justice is.

The defined existence of justice is then, a relationship with life and planet that can be sustained, with peace and happiness through the values that honor our existence; same for all.

To achieve that level of elemental discipline and order; society has tried numerous hopes. Each of which has crashed into corruption, and all things “university knows”. Because university is: how best can we manipulate/ control/ tempt/ poison/ motivate/ destroy/ deny/ alter/ and conceive of playing god with life or planet.

To achieve reality in the dimensions that allow discipline and order to build the society we need for our very survival in this day: only the elemental aspirations of democracy will do. While that too has been proven completely susceptible to corruption, and every form of “we are smarter than you: disease”; as is consistent with university runs everything (and we are then here, by their choices; at the edge of our own extinction). The reality of living is: that unless we do this together, with a deliberate decision to be fair; thereby justified in what we choose/ the possibility of survival does not exist for long. The only significant way of shaping each society for all involved is: by letting each one vote independently upon the laws,

and then rules by which society balances itself with order, and the demand for discipline in you and me; same.

There are four fundamentals involved with true democracy: we must have a contractual agreement (constitution) that outlines the foundations upon which we have agreed to form this our own society. Those foundations “of our intent” must be simple, short, and plain; so as to be immune from misinterpretation; as is the preamble of the US constitution/ its basic framework for making that happen, as is the “Virginia bill of rights”/ and the declaration of independence; which is a listing of complaints, that ought not to be done.

The second part: are the laws of the land, which are absolutely different than the rules to be obeyed. Every law is designed to identify no one/ but affect and discipline everyone; without exception. Thereby a law governs life and planet and resource, because that is its job under constitutional directives of what we desire our society to be. Only a few laws need to exist: short, simple, plain and protected from misinterpretation by limiting any intent to isolate some facet of that law. The rest shall be thrown away. To a climbing definition of all participants, possibilities, consequences, developments, purposes, and desires for life to be “better”; by allowing this to be done. A courtroom shall create this ascension of knowledge. Media shall then be used to combine knowledge with understanding. And then the public shall in fact decide by vote; if they will or will not accept this development or change in society itself.

The third part are the rules of society: rules are not laws, as their purpose is to identify and separate “a specific one, or a specific group, or a specific action”/ and they are always led by the righteous, who believe they are superior, and must control the others. There are only a

few rules that are necessary to any society: such as we all drive, in one direction, on the same side of the road. That is a necessary rule. To sustain peace in society: another rule is, you cannot invade my life, my space, with your industrial (consistent invasions, for long periods of time) intent or waste products; which does include noise. Business elements which are not “long periods of invasion across property lines”, or similar costs to living with each other in society: shall be limited. Another rule is: to sustain peace and happiness, we must have freedom. To sustain freedom: so long as I am not interfering in your life, or threatening your existence, children, property, future, or the like: you have no say in what I do. This is “a big category” on many levels, and it needs to be relegated to individual sections of a city. Nonetheless, the intent is plain enough; and the reality of losing your freedoms is known> defend yourselves from the righteous, and protect the value of hope. The consequences of “trying to find your own life; by your own choices”.

The fourth part of democracy is: **JUSTICE CANNOT BE ASSEMBLED WITHOUT TRUTH!** Therefore what is true decides what our future or the present can be, or become. Because only truth survives: therefore it is judge. While the evidence is jury. Reality then proves, the relationships that must be dealt with/ and wisdom or the lack of it: produces the consequences of our choices to be made. Thereby establishing knowledge, through understanding for our vote as a people: who do literally own this government of the people, by the people, and for the people.

As to the workings of a democracy: the first and foremost definition of fact is, that our constitution is our government; and no employee can become or claim to be “the government”/ because they are not the people who

decide. They are the employees paid to do the job that we have assigned; and they gave oath, to swear they would do that job as we have declared to be: "our definition of who we are as this particular society on earth".

The workings of society continue under 7 distinct rules of procedure to maintain the society we now own and defend.

1. The first rule of government: the courtroom must be defended, and that means the judge, litigants, lawyers and purposes of a courtroom shall be monitored and graded on a daily basis. With no opportunity to remain as a judge or a lawyer if you fail that grade. You will be removed/ and another put in your place. There shall be a bill of rights, that govern both the police and the public: to inform each, of what will be accepted as fair.
2. Unless you control the currency through constitutional law: the employees will attack, and destroy; as they have always done throughout history. Currency numbers SHALL be tied directly to a census count: so many numbers per citizen, and no more. International trade shall be by resource, or it shall be by "gold backed currency" that is governed by international laws: not independent nations.
3. Taxation requires, that every tax shall be decided by the people themselves; and there shall be no hidden taxation whatsoever/ nor shall there be any form of war against government, by unions or other/ nor shall there be any form of pension, or other: than "Just this one: which gives same for all". That tax shall be defined by a percentage of national GDP; and it shall go directly to the people who receive it, in their independent assemblies/

and be distributed, by their own decision, where possible. That tax shall then be declared as: this percentage of what is collected, by state or nation, shall be used only for “roads or schools or whatever it is to be”. NO altered usage, only as directed by the people themselves; but they shall be allowed to vote periodically to change that percentage (by taking it from somewhere else) as they desire.

4. Education is about three basic things: what can we do for ourselves/ what can we do for others/ and what can we do for nation and world and life to sustain ourselves through peace, happiness, harmony, and fair play. By balancing our lives and our society with discipline, order, and justice for all. Education has nothing to do with a *university diploma (memorize this, question nothing; and believe what you are told)*; and everything to do, with building a platform by which thought translates our existence into a value that is nothing less, than we were born as miracles. Education includes and forms around every part, and every piece of everything: that makes life precious, happy, and with a purpose beyond self. Or more distinctly love (the essence of a beautiful world) does not live in a prison of “only I am important”.
5. The foundation of every economy (we do this to survive): has absolutely nothing to do with money/ and it does have everything to do with resources, and the knowledge or understanding of how to use those resources responsibly to build our world. The foundation of university knows is as the evidence will prove: everything to do with

the destruction of resources/ and the damnation of every society on earth: to press them into self destruction, and therefrom extinction. They are removed from participation/ and limited to what we choose to let them do. OR MORE SIMPLY: DIFFERENT, than this day! To achieve that we use limited capitalism to displace money as the power of this world/ and establish by our periodic vote: the maximum and minimum income that any person shall be allowed per year/ and the limits on rights and realities; that they shall own with regard to any resource that exists. That dethroning of power and pride: opens the door to every other conception of what can I do now. But a failure to recognize RESOURCES SHALL NOT BE ABUSED; will end this earth. NO resources equals NO life; and the future has needs too.

6. The reality of our world is very simple: over population of humanity has limited our existence, to the decisions we are willing to make as a society/ rather than the wants you are allowed to make as an individual. Everybody has to work, no exceptions; or you don't belong here. But in this world throughout all societies of size: reality will demand resources cannot be wasted, and that means fifty percent of the population has no access to work or resource; just war. So world law comes first/ along with world policing by soldiers provided from all nations; to govern leaders, defend the planet, & to protect borders in conjunction with the law that we create. OUR WORLD WILL BE: a reality of chosen participation, for the purpose of building what will benefit all of us. By a reality of work; that is distributed to all of

us; by an educational role that shares rather than protects. While none like excessive competition, with good reason. The reality is much more simple: we are so many people/ and resources have been devastated so badly. Your independence is now limited to what can be done for life/ rather than what can be done for you. It ain't no game, either we share the work and build together/ or you war. Choose!

7. Nothing is more elementally human animal: than what you want to believe, and thereby do. As is the basis of religion. A human being alive: has graduated into the definitions that create an opportunity for more. Because they have realized: our life, and our world, and our future has been the result of a miracle called Creation. Or more simply: the eyes you see with, the ears you hear with, the food you eat, and everything that has value to the living: is literally the result of far more thought than any of us are capable of (miracles). That is the evidence, that is the proof of truth; as “we are now, alive”/ rather than born, “like an animal”. The difference is then in our own recognition of soul (I am a miracle). In conjunction with that fact, and the realities of “thought did this/ and nothing less, caused it to be”: the foundation of faith in the truth of those miracles, and the thought which establishes the fundamental functions of life and living and planet, and everything eternity could become. Shall not be dismissed, by the sewer vomit that is “university knows, religion” or its god called evolution; which is chaos did this, one piece at a time. Greater fools were never born. The end

result is simple: unlike every other time in history, we are limited to the realities of what we choose together as a world. WE NEED TRUTH TO LEAD US, AND THAT TRUTH BEGINS WITH THE EVIDENCE OF WHAT REALITY CAN PROVE. How is that not so?

8. The summary of discipline is: that constitutions rise, and democracies unite; because the constant threat of humanity preying upon humanity is never far away. IF THE LAW, by uniting as one people; does not control the predators among us/ then they win, and revolution (lets kill the others) begins. In fundamental ways: that does mean, it is absolutely necessary that the people should have their own means of defense. But it also means: without the law to remove that need/ there can be no peace for anyone. So the critical question is not: "is a gun, bomb, fire, or other bad"/ because it is. Rather the critical question is: can you identify hate, and remove it from society; because that represents the primary threat of predator against life. There is also greed, prejudice, selfishness, lazy, and more: but the law can control them. Hate disguises itself as "same"/ so that the attack, is a surprise. The others do not. The greatest threat life on earth faces today: is a university diploma/ as is proven by the evidence of our reality. They disguise themselves as superior, but ultimately the same, so as not to alarm: that their surprise attack can be against this entire world, and not just you or us. Look at the evidence: mutilating nature/ poisoning the earth/ trying to ignite atoms on fire/ destroying every resource/ altering diseases/ destroying

water and food/ and holding weapons of mass destruction, to insure you remain silent and afraid. Until of course, the point of no return has passed, and you have become “the living dead”/ because there is no solution for this. Life has been sacrificed, “to HELL”.

You literally need to come away from the curse, and the disaster that is “university knows” in all things: and find life back, along with respect for this planet and world of living existence. Instead of the constant manipulation, and true intent to control every aspect of your lives; by those who now consider themselves to be “the nobility (we are the superior ones)” of this world. Their leadership has created terrorism, biological mutilation as is the pure attack on nature itself through genetics, the demand to FEAR THEM ALL; and endless other catastrophe's that are by its effect; simply hatred. Respect nothing, enslave them all; WE ARE GODS NOW!

An example of the pure failure that is life in America today is this: I happened to stand behind a young man and his 3 year old child in a shopping line; who was having a difficult time with her speech. I normally would have tried to instruct them both in the necessity to use this time while young: to train the tongue, with simple word elements such as are the alphabet, vowels and so on. That enables the brain to construct sounds, and recognize the structure of those sounds as is the reality of using your tongue to identify and create combinations later. Instead of a polite conversation with parent standing right there. I held back, due to the constant onslaught of FEAR THEM ALL; as is the media feed of “Universities know”. Because of failure and the disease of universities spread throughout this world; the reality of being misunderstood,

expectations that could lead to endless “criminal concepts”; and a wide variety of other media frenzied curses to society: no help was given in this instance. Because I am tired of you all; and the incessant disgrace that is your cult worship of “the universities are god”. To your eternal shame. Pick yourselves out of the abyss/ rise above fear, and start living life again: NOT, their damned fears, and the deliberate intent to control you, life, planet, future, everything: **by making you worship them as your saviors (we die without you). A FANTASY, absolutely without merit: as these are the people who threaten to make this world EXTINCT. Saviors of nothing/ disease, disgrace, disrespect, violence, hate, failure, and catastrophe to everything: instead.**

The opportunity for trial is apparent in the book/ the need for investigating what will go wrong with extreme experimentation; is paramount to our survival/ as there is no going back in time. Too late is simply too late; so if you are willing to work for, or fight for this world/ now is the time. That is a decision only you can make. But make no mistake, the day is coming soon: when any decision that you make will not keep this earth alive, as we pass the point of no return.

This is a choice: if you have found a better way, to defend life and planet/ then do that. Otherwise, the opportunity for world wide identification of the problems, and the realities of what it means to be wrong/ and that potential to destroy life on earth. Must be dealt with. Rest the decision, entirely in true public trial; and by true public vote. So that we can remove the doubters, and construct the solutions with our own public chosen laws. This is not a game, and it does deserve your respect; of both life and planet; for which it was written. **To prove by the evidence, to a world wide audience: what is true,**

and what is false, and what is gambling with life and planet in ways that cannot be removed from the consequences of being wrong. It is the only way, to save this world. You, whosoever tried; have made every other attempt in other ways; and lost. Because “the expert” invaded, and the media influenced, and the power wanted what they wanted. What is left is trial: the foundation of “as best we can”; by the evidence, without prejudice/ simply by truth, that none are allowed to deny or cast aside. This is the choice we made!

*While I have made many attempts inside a courtroom to achieve this goal of trial for life and planet: only to be refused, **because the audience was not there.*** Even so, I never lost a trial by law, as is the intent of democracy itself; the value presented was change for life and planet. Only power and a closed door refused, the people who could have made a difference; were so afraid of being associated with me (*he ain't enough/ the universities will make us : ridiculed*); that they could not move. But reality proves, THIS IS TRIAL ABOUT: **life or death for a world! IT is NOT about me/ it is about us, and all life, and all future life, and even our habitat for living.** How is that not your concern; as well as mine? But the righteous are all cult worshipers of university knows; and they won't be swayed by truth or evidence: as is true of all believers. The price of life is, Don't measure: CHOOSE. Those who will represent you in court, will be chosen by you and me to represent us all: I reserve the right to participate. This, Trial is again: NOT about me, **it is about our future as a world.** Simple as that!

Prove you care: and the courts will obey. Prove you care: and media will come running, because their only real concern is, “somebody is listening”. Prove you care: and the politician will act in your favor, because wherever the

masses congregate, there they are. Prove you care: and the universities will accept the challenge, because after all, how is this not good for them/ unless they lose? Are they not so arrogant, they cannot conceive of losing the battle for what is true/ for what is the cost of being WRONG? It is again: the demand for trial starts with the single most horrendous experiments on earth. Trying to ignite a nuclear fire, just like on the sun/ here on this earth. **Which means, if their theories are wrong; OUR PLANET BURNS LIKE THE SUN. Their theory is: we can ignite plasma (burning the bond holding atoms together), and it will just extinguish itself, because there is not enough gravity here on earth to sustain the fire.**

ARE YOU WILLING TO BURN, AND GET SUCKED INTO A TEN MILLION DEGREE FLAME (just like the sun); when they are PROVEN WRONG? They are literally trying to burn atoms for heat; to play god. That fact, makes this entire planet a source of FUEL. Fusion has already been proven wrong. Their theory rests upon a fantasy element 15 times bigger in size than lead. Their fusion demands: for every BTU the sun releases, a helium atom is made/ yet helium is one of the rarest elements in this universe; proving that false without compromise. Fusion is the game, by which they get to play; while keeping you away, by assuming this is safe. It is a "bald face lie"/ and they know it. **The problem is: if they quit, they lose their job, their pride, their power, and their control over trillions of dollars. IS THAT WORTH, LOSING YOUR WORLD?**

You must identify yourself, as a participant in this work, to make a difference/ so that others will join. This trial, this purpose, this fight for life; that you chose to make of your own free will. Because anything less than a large number of people doing so, will cause this trial for life, to fail. **IF**

YOU are not interested in saying: YES, I DO DEMAND, that our world is worth protecting/ that we do have a LEGAL right to know, the risks of being WRONG. Then go away, because: a trial for life and planet, needs people who care. Not those, who just get in the way! I am “just presenting the message; **change this world or die**”. Trial is NOT about me/ *I threaten you with nothing, but your own evidence, your own information, simply questioning your gods of university knows.* **Because if they are wrong:** we do, literally all die/ and that includes me. **DEMAND AN INVESTIGATION; LET THEM PROVE THE COST, TO BE WRONG;** because even one single time many of their experiments go wrong; is enough to lose our world. **PROVING:** This ain't no game.

DO ask anyone who might get a book from you if they have an interest in this type of purpose; first. Because if they have no interest, you are simply allowing them to throw away your work and time. Leave them alone; **choose life, and work for planet.**

AS FOR THE COSTS; OF KEEPING OUR PLANET ALIVE:

1. CHANGE does mean: over half of all vehicle traffic will come to an end in the next five years. Oxygen is more important
2. CHANGE does mean: insulation will be mandatory, at levels never before seen. Global warming is due to heat release.
3. CHANGE does mean: air conditioning will stop, in all but the most severe needs. This merely multiplies heat.
4. CHANGE does mean: urban sprawl is dead. Life needs its place, and you need “the high rise apartment building”.

5. CHANGE does mean: human population growth will stop, and not be allowed an option over zero growth. We have hit our maximum population or life itself will die.
6. CHANGE does mean: the large fishing trawlers will cease fishing, for anything but plastics out of the ocean. No more destruction by over-fishing or pollution.
7. CHANGE does mean: recycle, rebuild, replant, reuse, renew, stop wasting resources; choose for life, do no harm; are going to control our lives. The future has needs too
8. NO extreme energy experiments of any kind, anywhere. "the reality of Satan (arrogance, and disrespect; destroys) on earth dies".
9. World law and world policing over leaders shall occur; thereby removing all weapons of mass destruction. Because they will be used, if you do not! The power of leaders will be diminished.
10. Deforestation ends/ replanting begins: or our atmosphere detaches, and accelerates to unlivable realities. Choose against extinction.
11. Currency will be returned to reality: that means, a clear and true accounting will be made/ and those who are at the foundations of society as is we the people; get paid back first.
12. Limited capitalism shall control power, by our vote over their income and possession of property, resource, or other. We do have the legal democratic right to decide what the maximum and minimum incomes for a year can be.

THE COSTS FOR KEEPING LIFE ALIVE:

1. truth will decide/ not want.
2. NO more genetic mutilation or playing god; without exception.
3. Healthcare shall become real/ and not governed by criminal extortion.
4. The water we drink shall be thoroughly investigated; and the risk of further contamination or loss shall be made clear.
5. The food we eat, shall not be mutilated further: that ends forever.
6. The realities of flood shall be mediated.
7. Critical decisions that control our future shall be displayed, defined by reality, and chosen by understanding the consequences of being wrong.
8. Changes in agriculture and all forms of human behavior with regard to what we are willing to risk, and what we actually need to be secured to survive; shall be constructed.
9. The value of a job shall not dictate the future/ instead we shall dictate the future, and determine how best we can all share in the work.
10. The realities of education, and its actual value to life: shall be defined/ and decisions shall be made. Over the universities/ instead of them over us.
11. Evolution shall be destroyed, as the lie it is becomes dead.

The sanctity of life itself and planet, SHALL BE RESPECTED. No exceptions allowed.

The measure of time exists in motion/ the measure of life exists in thought; but the reality of our existence lives within truth, because it is “the only thing” that can survive as our own identity. It is that identity that shapes our love,

and defines our heart. It is that essence of a miracle, that presents the value of faith. Nothing on earth compares with faith: which grows as the evidence of soul.

Discipline says; we are the passions of our purpose. Order says, we are the desire that builds a home out of truth. Balance says, the dignity of life can never be replaced with hate; because we are born into the experience and expression of thought released to become its own free will.

Destiny lives in soul. Choose carefully, as truth can never be erased; only hidden under mercy, if that is to be. The destiny of this earth is now: either "heaven as best we can" / or hell, because that is what the vast majority of humans, did choose for this world. What is truly in your heart, shall decide; because the value of it is at the core of what will be chosen. Nobody escapes what will be your truth. It is not a game, life or death stand as a door now, that will swing either way. Such is the truth, of playing god.

Certainly not because I say so; but because the evidence will prove, the cost of being wrong! Whether you search as a world/ whether you live or die: the reality of truth cannot be bought with anything less than honesty, and the distinct decision of soul. Soul is: a relationship with GOD OUR CREATOR.

Less, is death.

Less is, as men throughout history have chosen to do:

1. to hell with the law, let's take what we want with war.
2. Let's grow as a herd, one voice, one action, one defense; all or nothing/ same or die.
3. We have the weapons, we don't care, we are predators; and will kill to get more for us.
4. We all own it, but only the leaders shall decide.

5. We all want what we want, so let's believe in the mob.
6. We will believe; therefore we are gods/ and they are enemies.
7. If I own it/ then I will choose; and make them slaves.
8. The "gold" is my weapon, and I will hunt my prey down, and strip them bare.
9. Our greatest defense is FEAR US.
10. We can own this together, with rights for all/ but alas, the warrior will come; as those with peace, prove to be a weak enemy.
11. Together we can make laws for ourselves to control society by vote/ but alas, corruption follows, and then leads
12. All we need do, is give the people what they want/ even if it is all a lie, and the future, even the planet itself, dies.

Onto that backdrop of failures, as is proven by war and loss and corruption. The quality of a different answer relies upon one single decision: can we separate love from hate? Because love can and will live in harmony, sharing the decisions, and caring for life with a desire to protect the planet and all that exists forever.

While hate is the essence of war, and the reality of violence, which always lives to conceive of trouble, mayhem, and the mob.

Anger is fixable/ hate is not, but it hides so as not to be discovered. The essence of women is: that they know, what is in a man's heart, from how he treats her. They are a formidable reality of understanding; in that regard. But make no mistake, women hate too; and It is honorable men, who can best identify them. The question

is: do the majority of men, and women: **desire a society removed of hate?** Because if they do, all games; and the pride it finds; shall fade away, as the essence of love identifies what true happiness for us all, can become. All want must die, [it is the literal foundation of every lie] so that truth can build, a new foundation for living. That foundation requires our acceptance of, “a world that is, what it is”; and our work to make or rebuild it, as best we can in our own individual ways, or as we the world united for life and planet. If we work and live together by the terms of peace, fair play, justice, and functionally equal rights by laws chosen by the public themselves/ realities of money, as chosen by the public through a vote. We can survive, and do much more as time goes by. If not, this world has been damned (you knew better/ but did it anyway), by your own choices; through universities know how to play god. Unfortunately, that failure of wisdom, is a grave for both life and planet. It is yet, a single choice: change to make life first in all that you do, with respect for this planet, this living world. Or accept the cost of being wrong; because past the point of no return, there will be no reprieve; **life will end!**

And the people say: _____!

What matters not is want: humanity **must not** continue to grow in numbers or life on earth will be over. Resource losses **will condemn all life** on earth, and become war. Water losses **will cause** extreme violence, as the option to be less will die. We **must share**, or we fail; hate cannot do that for long, because that belongs only to love. **Love and hate are opposites;** they cannot survive together, hate will die (that takes all individual humanity with it, and violence erupts). Or love loses greatly, and can

dissolve forever. But humanity wants whatever it wants, as animals do. So the question becomes: are you human, identifying with miracles and the sanctity of life itself/ or just a plain herd of animals, living for want? It's a choice! And the people continue to say: "we want what we want"/ and we don't want nothing we don't want. So then the removal of hate provides a chance to survive; but the reality of human animals, whose only real desire is for "trinkets, toys, and trophies"; will cause life and planet to fail anyway. Because greed is rampant (thief)/ selfishness is ravenous (predator)/ pride is a rapist (Liar)/ lust is a prison guard (prey)/ power demands superiority (I am god)/ and religion believes in whatever it wants is god (fantasies). The choice is more than love or hate then: it is also the reality of those who "live in the middle, as animals (failure)". And what they will or will not do, when confronted with "want without reality, is now dead/ or you, and your world, will soon be: instead". Its a choice. But unlike any other time in history: our numbers/ our reality of universities know lies/ our threats of extinction/ our planet is dying/ our nature is being mutilated/ our everything is failing. There will be no second chances past the point of no return, and there is no going back in time, to do anything over. Choose for life or die, is a truth! Like it or not, is absolutely irrelevant: **truth will decide/ not you!**

I have met an endless line of people, whose only real concern regarding anything of merit: was their intent to prove themselves superior to me; by making life and reality into a game, with whatever means was available. As is lies, traitor, fantasy, stealing, power, pride, manipulation, control; chains (you can't leave/ you must) or whatever they desired most. If that doesn't work, ridicule (you can't defeat me), gossip (I found "a hair"),

judgment (I know righteousness), assumptions (I am god here), anger (never again), and even hate (I will remove your life) begin. But, nobody is perfect; and we all have to pick and choose; within the value of our most defined desire: just doing the best we can. Those who believe they "have everything they wanted and more"/ rarely escape the tragedy of arrogance and pride, will rule their lives. In other words, the list is long: of things that must change to inherit (*what was good between us/ outweighed the bad*) a life that would be desired; "for a thousand years or more". That is a lot of life, either saved or killed by your decision. The world will run out of resources, and life will end at that point: when, is up to the people who are here, and what you take or destroy or rebuild as best you can. If you don't allow the universities to simply exterminate you as they are doing; and will soon complete: just to prove they are superior, to you! After all, every herd has its leader; the one who gets to fuck the rest. Isn't that so? In human terms: we want, organizes the herd/ we believe organizes the mob/ we are right, organizes the power. Be alive instead, standing outside the herd; as a miracle of existence, choosing to belong to GOD. It is worth the price of love. The difference begins with; want does not choose for you; the value and acceptance of the miracle that is life, through respect, does: as the elements of truth decide the path we will take as, an individual identity.

I do wish you well; but your decision is your own. And we both know: I CAN'T save you or this world/ only you can do that. By making the changes that will keep this earth and our nature alive. In other words: university is god **MUST END.**

You are standing on the edge, of extinction; even if you don't know it! **While I find that tragic**, forty plus years of work, could not turn you aside from your greed (I want

everything/ I want yours too, more, more, more), or from your fear of being ridiculed (I can't/ I won't)/ or the belief; your worship of university "as your god". Simple as that, so here we are, a reality of life, facing the end of the road! The disease of complete disrespect; ready to kill you.

As for you: happiness cannot be bought for long/ rather happiness is a relationship formed with, life cherished. To achieve that foundation or essence of growth by the elements of our thought, we must in fact cherish the miracle of what we do own as our body, our time, our identity when chosen, our opportunities in freedom, our search for eternity, destinies in thought, our own experience or expression or value for love, either as a gift or taken/ shared, or by caring. Peace comes with love. Value comes with harmony. Isolation, and depression both leave if you remove want, and accept destiny "hears our call, our choice for love". Not a battleground; a relationship in soul, a desire of the heart; a value beyond the constrictions of time.

As for our world: a nuclear fire will not extinguish itself, after all, this entire earth is fuel/ just like the sun (*a biblical prophecy of extinction by fire*). A biological nightmare: genetics surrender to one tiny mistake, that cannot be erased; which then changes everything (*a biblical prophecy called Armageddon which means nature in chaos*). A planet without enough drinking water, thereby war with such ferocity that blood flows like a river in cities with millions and more; because there is no time. *A biblical prophecy called the Apocalypse. A biblical prophecy of Daniel predicting the last countdown of days; starts, when the great abomination rises; thereby ends in the **spring of 2021.** Which literally is: gambling life or death for this entire **world, and all its life; on the fantasy** we can control the same fire here, as is on the sun/ risking*

even the solar system itself. *The book of Revelation has begun with chapter 12* (the only good sign of a possible future): that starts with “a spiritual woman” standing on the moon(something foreign, but seen since the beginning of humanity: a man. That is me. While the critical evidence of your reality is: that you do stand on the edge of extinction, because of decisions made. Threats which must be dealt with now, before they pass beyond the point where changing anything will matter. It is no game, life or death is now your decision, as you chose to play god with both nature and planet. I say to you plainly: prove your own evidence of threat, is wrong. Not by fantasy or theory or university knows (even though they don't): but with facts, and clear definitions built upon truth.

How is that not fair, or consistent with truth and fair play? Don't believe, prove what is true, and the consequences for being wrong. Life can end, is that not so? The planet can die, as has happened in places men abused too much. The sun exists, and beyond the limits and boundaries of chemical energy, that do govern our world; nuclear fire, exists as well. The sun is true evidence of that/ it ain't no game. Even the radiation itself from that energy release would destroy all life over half the earth or more. How then, are not the people trying to ignite that nuclear fire; “not the embodiment of SATAN”? *The description is “destroyer of worlds”!* That is the gift of “university is god/ believe don't question”: An arrogance so blind, they believe they are gods, and *can play literally play with the energy* that heats our planet from 90+ million miles away; the same as on the sun. a NUCLEAR FIRE! **Is that you too, so proud and arrogant being WRONG; cannot exist? Shame on you.**

The universities promise you everything, but in

reality they are, by their own description: monkeys playing with far worse things, than multiple atomic bomb. But then “even real monkeys' would know better” than to do the things universities do. No going back; stop them or die. Get a courtroom and **learn the price of “they were wrong”!** **Or the “Satan's” you have let loose upon your world, WILL make you extinct.** Alas, you worship your monkeys; its like the wizard of oz; only there will be no returning to life as it was. No returning to the planet as it was. No definitions of nature in balance, grace, or beauty, as it was. No possibility of life or living at all: because you gave it all away, to the people who lied. And knew little more than fantasies about life or living or planet or energy. To your eternal shame.

Such are the definitions of this day, when placed where the sun shows what is true. And all the people say: we can do nothing/ we could do nothing/ we are not responsible, because we are not leaders. But you are wrong; as nothing happens without you, to build and sustain and protect those who do lead you. But you are wrong, when gathered together, and united upon a purpose that has merit: “a million plus” people cannot be ignored. Those who have no brain, will then find something; because you helped them see truth. So your excuse is without merit, and your claim is destroyed by the reality of your own “university worship”/ as the devils helper. You have earned your reward (death to our world); to your shame.

I have ended my concern for you. From the “wizard of oz”:

You are the cowardly lion: willing to go to war and kill/ but hiding in the darkness, shaking with fear; and yelling NO I CAN'T. At being told you must investigate your universities; because what they do/ and what they did; is

to put this entire world at risk of extinction.

You are the “scarecrow wanting a heart”; discarding the truth you know about your own body of life, your own nature, your own world. The realities you see, experience, express, hear, touch, and so much more. A heart is more, and finds itself surrounded by the values and the essence of love. but Because the universities tell you to believe only in them, “no heart/ just want”; and their god of evolution “no brain/ just pride”: **you do!** To your shame, they own just one grain of sand on an entire ocean beach. Even that as is adaption, proves the value of design by its forethought.

You are the tin man without a brain: having eyelids, and tears/ having fingers and touch/ having thoughts and love and freedom and movements. Having a body that works for you, and is able to do so much at your own slightest command. Knowing that your own ability to “build anything” CANNOT COMPARE, with nature itself. Proving none of this is an accident; because there is no such proof in life, nature, or planet. THOUGHT CAME FIRST, “or life would not exist”. But you have no such thought, only want; as animals do. The universities stole your brain, to their eternal shame. Because you let them, to your eternal shame. **AND THAT DOES make the universities, the fraud behind the curtain; pretending to be “god”.**

I suppose, in all fairness; that would make me “Dorothy”; like it or not. Her dog, the words used to pull the curtain away. The “flying monkeys “worshippers of university”/ and the little people, all those who claim “I am too small to make a difference”; true or not. Whether this is then a prophecy or not, I won't guess. It is however, an imagery that seems to live out/ such as is “the people blindly staring at a TV screen” as was predicted if memory

is correct; in the book 1984. both predictions a little ahead of their time; such as prophecies are.

You want what you cannot have: "let me think only kind, peaceful, friendly thoughts that never have to be confronted by realities I don't want". Or, I just want what I want, while screaming "and nothing else". But life is not like that, and every reality you avoid; just becomes a bigger monster that then threatens to make you extinct. BE REAL, and that means, accept your responsibility to protect this world, its life, and its future. As all respectful living humans being alive are required to do. Not a game/ life or death for this world; because the universities have become a monster/ and extinction is now going to be real.

HOW MANY days are left before we pass the point of no return? It doesn't matter; because what does matter, is how many days are left, before you care enough to try? Is literally the only thing that can change this world, back to life and planet and child; comes first. And the people say: "YOU, ain't enough"!

And I say: but the evidence is/ the cost of being wrong is/ the value of life is/ and the future for every child IS, our responsibility. But your complaint is NOT!

And the reality of CRISPR, a biological open gate to human redesign and mutilation of biological genetic structures that control the realities of every living body of life on earth. A decision, that cannot be returned to how nature created and kept us all alive; throughout history. A decision that opens the door to chaos, as is the "university described god of evolution". WHEN DID CHAOS, benefit life? Answer the question/ and recognize the university fools.

And the reality of trying to ignite atoms on fire is; because once ignited this whole world is fuel for that fire.

And the reality of over population is; in a world

growing by roughly 250 million new mouths to feed every year/ and all the resources they need. Average distance across the USA is 3,000 miles; that equals a human being standing "touching" at 3 feet apart: 5,280,000 places along that line. Even at the lies of university fraud, the population of this USA is 329 million or so: that equals 62 lines of people, standing at 3 feet apart in the width direction: $3 \times 3 = 9$ square feet. That equals a mass of "solid humanity"; standing on 327,360,000 square feet of land, just in this USA.

The reality of drinking water is/ the reality of pollution is/ the tragedy and disgrace of everything that humanity represents is; because you have no honor or respect, only the fantasy of university knows; and their death march forcing every life into the slaughter house, for one last horrifying scream. Simple as that; and yet you don't need to know; until the curse of damnation takes place, and the door seals behind you/ and the grave opens its door. To prove: TOO DAMN LATE NOW, because you just didn't care enough; to recognize, the university god you worship is SATAN/ not life! Not to worry though, religion knows: whatever they want, is what they get; RIGHT?

Oh wait; I forgot to mention: according to your universities professors. We don't have to worry about any biological catastrophe, because according to them: evolution will just build something else, "in a billion years or so". IF YOU have a brain: THEN tell yourself, WHAT IS WRONG, with that plan?

And then we have "fusion"; the biggest fraud ever conceived: "not to worry, there is not enough gravity here on earth to sustain the fire/ so it will just extinguish itself". But of course if they are wrong, our earth becomes a sun for real. Not imaginary like their theories.

And then there is the longer term: we don't have to worry about water or poisons or anything/ because overpopulation will kill us all, one way or another; soon, anyway. So we might as well have fun/ and do absolutely nothing, except "inflate currency" so the universities can play.

Alas, in contrast to the universities claim of superiority: nature is everything about everything alive, because nature is "perfect" in and of itself. The universities demand NOT anymore/ and the people fall down to worship their Satan.

In contrast to the universities claim of superiority: this planet is everything about everything that can or could be our home, our sanctuary against powers greater than we can defeat/ making this planet life or death in and of itself. The universities demand NOT anymore/ and the people fall down to worship their Satan.

In contrast to the universities claim of superiority: we are not dead until we are dead/ even though everything the universities do, is designed to destroy the very foundations of our existence; so they **can proclaim themselves as god (SATAN). By proving they have the power to change this world.** And humanity says: all fall down and worship, with your ass in the air/ and your nose touching the earth; **so as not to see, or believe anything but what you have been told!**

And all the media say, along with every leader of every organization: RIDICULE HIM, he is worthless and alone. **LET THE BRIBES OWN YOUR HEART.**

____Your leaders say: the population growth is far less than one percent per year or currently **.61% . for more clear understanding by easier math: if we change that too .5% (half of one percent) that means, in this USA there is one more child over deaths; per every 200 people**

per year. They have said: that world population growth for the last century is 1%; do the math yourself, look outside your door. And understand what it means to be wrong, and just look the other way.

Your leaders say: weapons of mass destruction are “your saviors”.

Your leaders say: we can control the same fire as is on the sun, here on this earth.

*Your leaders say: ten thousand things, that are obviously **WRONG**.*

***WAKE UP NOW; OR DIE! This ain't no game.** And there really is, very little left to say, in order to motivate you as a world: to save yourselves from extinction. If you don't care/ then you don't deserve to live, and will achieve your choice.*

*Your leaders having been taught “everything” by university religion (never question us, **JUST BELIEVE**): they will say, as they have declared in the past. This man is worthless, delusional, and without sense; as he has declared for himself: that he is under the influences of a “spiritual woman”. A reality of participating in the spiritual world, rather than in our own reality of universities know best. A religious NUT!*

*I have said: whatever it is, that you declare me to be, is absolutely irrelevant; because **the evidence of threat is all that matters when confronted by the truth of extinction,** as declared by the reality of our choices under universities rule. Whatever you believe about me, has been proven constantly to be wrong; even among those who know me. **Don't believe, search for truth!** I have said: “think for yourselves, and recognize the cost of being wrong”. The universities say: “believe only in us, and all power in society, has demanded: **YOU SHALL NOT***

question the universities, who are their god”.

Do you see the difference?

Education has a value, but it also has a price, just like the spiritual world: if you fail to discipline yourselves with truth, and the consequences of reality/ you will end in horror. Truth alone survives life and time. It is not a game.

You will either: INVESTIGATE THE REALITIES OF WHAT IT MEANS TO BE WRONG/ IN TERMS OF EVERY MAJOR THREAT. AND YOU WILL DO SO QUICKLY, or the point of no return shall pass, leaving your death march; in the abyss of HELL. With no possibility of escape. Simple as that. Not a game. Not my threat. A reality of the evidence formed because “you have been playing god”/ **and failed every part of life, living, and the future!** *If you won't change, then you will die forever; and face the eternal wrath of GOD because you chose, to crucify life, and destroy HIS WORLD.*

*I guarantee, **TERROR comes;** for that. And your religion won't save you; **only faith in what is true/** NOT belief in what you want eternity to be.*

EVERYTHING OF VALUE THAT LIFE IS, LITERALLY EVERYTHING THAT IS BEAUTIFUL AND PRECIOUS AND WORTH THE PRICE OF EXISTENCE: IS BUILT UPON THE REALITIES OF NATURE AND THIS PLANET AND ITS RESOURCES. *Your universities have chosen to destroy all of that, with extreme and completely disrespectful experiments, that are guaranteed to be extinction. Because they are as a blanket statement of failure, by all forms of fantasy: “fools, liars, traitors, and thieves”; as reality does prove. What is not on the edge of chaos (take a hard look at all life on earth)? What is not lies (take a hard look at, fusion: don't worry, we can control the sun)? What is not traitorous (take a hard look at resource loss,*

and biological mutilation)? What is not outright thievery (take a hard look at currency, and all forms of debt)! Because none of it, under universities leadership can survive: extinction is under way! AND YOU, are their fools; and you choose to let them assassinate your children: to your eternal shame. While religion says: **"GOD" will do everything/ we DON'T have to do nothing;** as is your contribution to life itself; to your shame.

An appropriate ending to this work is very simply this: in order to survive, and keep this planet alive as well, MASSIVE CHANGE must occur immediately. As every day that goes by causes you, and this earth; to fall deeper into the abyss universities, and their cult worshipers have made. It is not a complicated change. It is very simply: ONLY TRUTH, and the realities of consequences we cannot allow to go wrong: SHALL DECIDE. Every part, and every purpose, and every thing this world can be; which does mean all human want is disposed of in the sewers, where it belongs. No exceptions/ no excuses/ no going back/ no endless amounts of "we want this"; because that is dead. OR YOU, and our WORLD, ARE dead instead! Its not a game, massive realities of failure, disgrace, fantasies, and much more; have convicted you to extinction. They must all be erased from our existence; or that extinction will succeed. The primary cause of complete disrespect for both life and planet; is a very simple "WE WANTED THIS, AND WE ARE TAKING IT"! But alas, you took balance, order, discipline, respect, love, friendship, courage, value; and absolutely everything that makes life worth living; and by your university cult religion, and its constant we can be gods; that you chose to destroy the future, and even yourselves. To your shame.

The road back to life and earth shall survive will

not be easy; but if you don't pay that price: it is certain, extinction shall come! To accomplish that reality as truth, that none can avoid without extreme lies: IT DOES, REQUIRE A PUBLIC TRIAL, ON THE TRUTH OF WHERE WE ARE, AND WHAT OUR THE CONSEQUENCES WE NOW FACE? The question begins with extreme experimentation; and then turns to demand zero population growth or die.

IT IS, ABSOLUTELY ESSENTIAL: that you turn this world around by law, and in no other way. Because as history proves, without law, all you get are different rulers: with the same corruption, same wants, same demand for power, same pride, same everything; with only slight differences between them. By the law, the law then rules. By the law is our government instead of people: and the law controls our lives, our society, and our future. By the law that we vote upon, as our own decision; based upon constitutional we the people demands: we become the government for ourselves. By the law, we own the courts and its policing: "our government/ our society, not yours". Because when we make the law for ourselves, and it is simple, short, and plain: then we can and will defend ourselves, and our nation, and world according to that law. Needing none to explain it for us. As the words: have been the weapons used against us by university knows. By the law, we will control the military, and choose world law for ourselves. By the law, created under constitutional direction (as one citizen one vote): we become the lawmakers, and we become the tax creators, and we become the foundation upon which we stand as one people united. No more outside influences; true democracy erupts. By the law, we take away their power: with limited capitalism identifying just how much power, or resource; anyone can take for themselves. By the law:

we will take control over the universities, and remove the threats of terrorism; the insurgency, designed to consume our nation, and build their own: as is so common against all life and planet that they created, to destroy us. By the law: REDRESS OF GRIEVANCES, a first amendment law: designed to insure our government employees shall indeed keep their oath of office, demanding it is the constitution that rules us: NOT YOU. But make no mistake: stupidity and ignorance, is just as bad as power and pride without justice. You must let truth decide the future, you must accept reality will govern this moment by putting life comes first, you must respect the consequences of being WRONG; and assemble the necessary protections for insuring that is not going to happen anymore. Simple and plain: we need the law to survive; but we need our law, NOT their law which is "the university nobility owns everything, runs everything, decides everything, and has all the currency inflation to spend that they can want, or desire" as is their chosen, proven, decision.

Like saying: "the government" is like saying "the university"; neither is true to the reality of what exists. Rather blanket statements as are these; translate into the source of corruption is hiding behind this covering; and we must dig through the rubble, trash, and disease; to find the real trouble hiding in a man or woman or their groups.

Like government; universities have groups of people and individuals that can and do make life better: and they must be protected, as they have earned that right. But just like every large gathering of people; there are traitors, predators, thieves, liars, murderers, terrorists, and even worse hiding among them; because wherever there is power, there too is hate! To sort and separate

hate, is the primary mission of life on earth; because without hate, there is peace and harmony will come. With hate, there is violence, and all things tragic to life and humanity and earth. War will not cure hate/ war breeds hate. Law breeds the possibilities of love, by removing primary obstacles which interfere in our chance to participate as equals, and live as friends. Do you see the difference?

The difference between what can be done, and what is being done: is determined by whatever people believe will expand, or sustain, their collection of wants. Want then becomes the entire motivator of society, apart from love or hate. So the critical question is: WHAT do you want? The answer to that, becomes life in society for you and your group, nation, or world.

Once needs (I survive) are met: want always fights for more, with only a tiny few exceptions. There is no real chance in that between generations: simple "I want more"/ and every society says, "with MONEY, I can get more". So the curse of society is money, because money then takes from the majority to give to the few; the power to change our lives, and theirs.

Limited capitalism: shifts that demand for more, to whatever the people decide is fair play for us all. Yes, there must be a reward for those who do more for the majority, or even groups. But no, there must not be an attack on the rest, which causes society itself to suffer the cost of you, and your greed. To accomplish the value of us all, in economic terms: the reality of our choice, can become.

1. Our vote determines your excess/ and our society.
2. Our decision, as a nation; to identify and thereby

control business: with the demand, that you must advertise the maximum percentage increase on what you sell, against what you buy to sell. That can then be found in your store. Lets all compete, and understand more fairly, as advertising no longer controls the outcome. The foundation that must occur in society returns too: we can walk, to what we need or even desire; with only few exceptions.

3. Our decision, to remove private enterprise from healthcare: establishes and retains free market realities/ by controlling the tools, medicines, utilities, college enrollments, buildings, and everything but labor. With regard to all things healthcare. That labor is then graded by the public being treated; and the advertised result shall become known to all. No more attacking the doctors; because if was NOT criminal, it was reality (as best we can, in this moment of time). If it was criminal: prison or other suitable actions are deemed necessary. Insurance as depicted by all, is where you turn.
4. Our decision, to separate all forms of industry, monopoly, university, and organizational conglomerations designed to take control of our lives or our nation or our ability to choose for ourselves. Is consistent with protection of this democracy; as nothing is more defeating of life and freedom: than is only a tiny few get to decide everything.
5. Our decision, to reorganize government: to identify and create the necessary laws for ourselves, by our own vote is elemental to true democracy. That means our representatives shall

then become investigators to prove or disprove: that our choices as a society, as a nation, are or are not being kept properly and with honesty as was our intent. They shall not own us anymore: we will decide. They shall not make debts for us to pay: we will decide. They shall not declare war: we will establish the frameworks, which demand a retaliation, and to what degree that will come. They shall not enforce power; but shall establish our laws for life and property and the purpose defined by our constitutional agreement: to unite and defend ourselves as contractually agreed.

6. Our decision, to control and investigate and identify: all the true threats of extinction that exist. Shall not be denied, not know/ not ever. A foundation of purpose to this effect shall occur, and be identified and controlled by constitutional law; as must be established. Nothing less, and nothing more will do: NOBODY gets to refuse, that life and planet, and the future shall be protected. And that includes from the consequences of being WRONG, in ways that cannot be reversed or changed back to how "nature and planet intended this to be". We exist because of nature and planet and how they were "seamed together" to balance, discipline, and order our lives into a living creation of existence. ANYONE seeking to destroy that fact, is an enemy to be sought out and removed from their threat. Protect life and planet, or go extinct: simple as that.
7. Our decision, to create world law, and world policing of leaders, and protection of our planet; as is needed and proven true. Cannot be done without the soldiers from every nation

participating as one entity for that purpose; primarily on ships so as to remain neutral. We control the remaining logistics of weapons and supplies as is needed to insure they cannot “climb into a threat”/ and we insure that none are allowed more than four years in their respective positions; so they cannot truly organize against us. And we control the courts, where trial before the world shall be evidenced as fair or not fair/ as true to the laws we created or not; and in need of change. Ending all assertion: that any nation shall in fact be allowed to keep “their weapons of mass destruction.

The value of nature, the value of planet, the value of every body of life, the value of oceans, the value of chains that create our living structures of existence, the value of EVERYTHING THIS PLANET PROVIDES/ EVERY BODY OF LIFE IS; CANNOT be measured by humanity, it is too vast/ too delicate/ too enormous to conceive of. In contrast to that: the value of human decisions and realities of what they do and do not contribute to life and planet CAN BE MEASURED as extinction, death, violence, destruction, greed, selfishness, lust and as a mass diagnosis: the ultimate truth of that is failure. Whereas the natural reality of what we were given to work with in this life we are granted as time: is literal success, by the truth it provides and obeys. A reality so superior to human decisions, that they do not compare at all. NATURE WINS, AND IS AS PERFECT AS WE CAN IMAGINE OR PROVE ANYTHING TO BE. THE PLANET IS OUR HOME, and we can only disgrace that, by the constant majority disrespect that is “the human choice”. The curse of university is: their decision to do even worse than disgrace and

disrespect. Their decision is: to change nature/ and to destroy the planet/ and to curse the future with death. As the evidence does prove.

Stop this SATAN from completing its work, or you're dead; and do become just as responsible as they; for killing this entire creation of life. A reality that comes with consequences, and terror!

IF YOU WILL COMPLETE TRUE DEMOCRACY: then you will choose to make your decisions in this way. As the jury, or its vote; can never be fully without the influence of what people want; and all the lies and deception, that will cause.

To achieve the best possible outcomes for life and planet: "a tree of knowledge" must arise. The constitution becomes your foundation of all law, and from that arises all the possibilities for or against every decision that life or planet would entitle you to make. The confrontation is: whether ANY of these possibilities to be discussed are true, or not true, and thereby discarded. Once the fundamentals of our ability to understand, have been established. It is then that the consequences of what it means to life and planet and future: that must be determined to the best of our ability. Those too, are then discussed to determine what is or is not true. And when you have a functioning knowledge of what our future is to become; either direction that we choose to go. It is then the right of society to choose for itself: the decision that becomes our choice, with all its purpose or consequence.

More distinctly: this is the removal of want/ and the decision to allow truth to create the choices of our lives; and will culminate with the investigation of: is this what we chose/ or is it not? Truth is the basis of every law, and every law has a predictable outcome; that can be

recognized in every stage of development.

People want what they want, and constantly refuse reality so they can get what they want. Want being the foundation of every lie; means the greatest liar most will ever face is themselves. To offset that truth: governments must arise from the reality of our need/ the consequence of our choice: to achieve the value that we can create, if subjected to "the truth alone decides" as best we can understand. Thereby removing that want, and instilling the value of what will survive, because it can/ once hate is removed. The elegant solution is then: to create the situations, the conception, the disciplines, and the order which balances all voices in order to achieve what we can honestly know as truth! How you vote from there: determines your own life, nation, and world. That then "is government".

In America the foundation of all government has failed: because they made it about the money, not the purpose of society, its need, or its desire for peace or harmony or happiness. The cost of that is destruction. The reality of fixing that is then to build without money in government. To achieve that level of democracy in action: it is the people themselves who must decide what will be done, as the level of opportunities arise to build rather than destroy. We vote, to create a percentage of taxation that then is used for "our government" as chosen. But to build is a decision of the heart; because money once removed from government: relinquishes the right of the people to decide for themselves. Therefore what we build for our lives is determined by what we contribute or chose as we the people, for ourselves, our nation, our future, or our world.

Money is used to bribe (do this anyway) and control (we won't let you have what you want).

Government is used to identify what is true, so that those who build for life, can achieve a greater value, than those who believe: I alone matter. Remove the excess money from selfishness, and its greed: and that turns society to us/ not just, "I".

If you then fail life or world or nation, it is not because of government/ but because of you.

Love is an eloquence of the heart, a decision that binds the purpose of passion with the desire that is pure honesty. It is never want, because love rises above time to become the value sufficient, to know eternity is not long enough, to make me forget "you". To accept that destiny, is to know: the essence of my soul, has become yours; just as yours has become mine.. never for control; only for life beyond the limits of self. Beautiful is then, where happiness meets eternity, to share our truth, by the passions of our care.

In contrast to that balance for this message to life; is the reality of what humanity, and their worship of university has done. Which is to take all things beautiful and precious: to crucify, kill, maim, plunder, betray, and horrify. CHANGE DIRECTION or receive your reward. But do it quickly, or reality will care about nothing you can be. Make your decision: LIFE, or HELL? Because you will not stay where you are!
